JOURNAL

OF

BACTERIOLOGY

VOLUME 89

BALTIMORE, MD.
1965

EDITORIAL BOARD

WILLIAM B. SARLES, Editor-in-Chief
University of Wisconsin, Madison

EDWARD A. ADELBERG, Editor
Yale University, New Haven, Conn.

L. LEON CAMPBELL, JR., Editor
University of Illinois, Urbana

L. JOE BERRY, Editor
Bryn Mawr College, Bryn Mawr, Pa.

HAROLD S. GINSBERG, Editor
University of Pennsylvania School of Medicine, Philadelphia

ROBERT AUSTRIAN (1969)
Hospital of the University of Pennsylvania, Philadelphia

W. LANE BARKSDALE (1969)
New York University, New York, N.Y.

S. S. BARKULIS (1969)
CIBA Pharmaceutical Products, Inc., Summit, N.J.

L. S. BARON (1969)
Walter Reed Army Institute of Research, Washington, D.C.

ALAN W. BERNHEIMER (1969)
New York University, New York, N.Y.

S. GAYLEN BRADLEY (1969)
University of Minnesota, Minneapolis

ALLAN CAMPBELL (1969)
University of Rochester, Rochester, N.Y.

GEORGE B. CHAPMAN (1969)
Georgetown University, Washington, D.C.

C. D. COX (1966)
University of Massachusetts, Amherst

WILLIAM J. CROMARTIE (1969)
University of North Carolina School of Medicine, Chapel Hill

A. L. DEMAIN (1969)
Merck & Co., Inc., Rahway, N.J.

JOHN A. DeMOSS (1969)
University of California, San Diego, La Jolla

R. D. DeMOSS (1969)
University of Illinois, Urbana

MICHAEL DOUDOROFF (1969)
University of California, Berkeley

C. W. EMMONS (1966)
National Institutes of Health, Bethesda, Md.

JOHN F. ENDERS (1969)
Harvard University School of Medicine, Boston, Mass.

ELLIS ENGLESBERG (1969)
University of Pittsburgh, Pittsburgh, Pa.

FRANK B. ENGLEY, JR. (1969)
University of Missouri, Columbia

E. EDWARD EVANS (1966)
University of Alabama Medical Center, Birmingham

A. E. FELLER (1965)
University of Virginia School of Medicine, Charlottesville

WILLIAM E. FERGUSON (1969)
Michigan Department of Health, Lansing

RUTH E. GORDON (1966)
Rutgers, The State University, New Brunswick, N.J.

ANGUS GRAHAM (1969)
Wistar Institute, Philadelphia, Pa.

MAURICE GREEN (1969)
St. Louis University School of Medicine, St. Louis, Mo.

LEONARD HAYFLICK (1969)
Wistar Institute, Philadelphia, Pa.

WERNER HENLE (1969)
Children's Hospital, Philadelphia, Pa.

JAMES G. HIRSCH (1969)
The Rockefeller Institute, New York, N.Y.

JOHN HOLLAND (1969)
University of Washington School of Medicine, Seattle

JOHN G. HOLT (1969)
Iowa State University, Ames

PAUL HOWARD-FLANDERS (1969)
Yale University School of Medicine, New Haven, Conn.

JERARD HURWITZ (1969)
Albert Einstein Medical School, New York, N.Y.

ARTHUR G. JOHNSON (1969)
The University of Michigan School of Medicine, Ann Arbor

ELLIOT JUNI (1967)
Emory University, Atlanta, Ga.

R. E. KALLIO (1969)
State University of Iowa, Iowa City

LLOYD KOZLOFF (1969)
University of Colorado School of Medicine, Denver

J. O. LAMPEN (1965)
Rutgers, The State University, New Brunswick, N.J.

EINAR LEIFSON (1966)
Loyola University School of Medicine, Chicago, Ill.

H. S. LEVINSON (1969)
U.S. Army, Natick Laboratories, Natick, Mass.

H. C. LICHSTEIN (1965)
University of Cincinnati College of Medicine, Cincinnati, Ohio

W. R. LOCKHART (1969)
Iowa State University, Ames

A. G. MARR (1969)
University of California, Davis

ELIZABETH McCOY (1969)
University of Wisconsin, Madison

JOSEPH MELNICK (1969)
Baylor University College of Medicine, Houston, Tex.

FREDERICK C. NEIDHARDT (1969)
Purdue University, Lafayette, Ind.

EVELYN L. OGINSKY (1969)
University of Oregon Medical School, Portland

KENNETH PAIGEN (1969)
Roswell Park Memorial Institute, Buffalo, N.Y.

JAMES T. PARK (1969)
Tufts University, Boston, Mass.

ROBERT C. PARLETT (1969)
George Washington University, Washington, D.C.

MICHAEL J. PELCZAR, JR. (1969)
University of Maryland, College Park

H. J. PHAFF (1969)
University of California, Davis

A. F. RASMUSSEN (1969)
University of California School of Medicine, Los Angeles

ROY REPASKE (1969)
National Institutes of Health, Bethesda, Md.

C. F. ROBINOW (1966)
University of Western Ontario, London, Ontario, Canada

W. R. ROMIG (1969)
University of California, Los Angeles

HARRY M. ROSE (1969)
Columbia University, New York, N.Y.

RUSSELL W. SCHAEDLER (1969)
The Rockefeller Institute, New York, N.Y.

LOUIS DS. SMITH (1968)
Montana State College, Bozeman, Mont.

PAUL F. SMITH (1970)
The University of South Dakota, Vermillion

CURTIS B. THORNE (1966)
MB Division, Fort Detrick, Frederick, Md.

LEWIS W. WANNAMAKER (1969)
University of Minnesota, Minneapolis

HELEN R. WHITELEY (1969)
University of Washington, Seattle

J. B. WILSON (1969)
University of Wisconsin, Madison

WILLIS A. WOOD (1969)
Michigan State University, East Lansing

ROBERT A. DAY, Managing Editor, *115 Huron View Boulevard, Ann Arbor, Mich.*

EX OFFICIO

ORVILLE WYSS, President (1964-1965)
University of Texas, Austin

R. D. HOUSEWRIGHT, Vice-President (1964-1965)
Fort Detrick, Frederick, Md.

PHILIPP GERHARDT, Secretary
The University of Michigan, Ann Arbor

H. B. WOODRUFF, Treasurer
Merck & Co., Inc., Rahway, N.J.

AUTHOR INDEX

INDEX TO DATE OF ISSUE

Month	Date of Issue	Pages
January	1/19/65	1- 264
February	2/15/65	265- 550
March	3/29/65	551- 930
April	4/15/65	931–1162
May	5/21/65	1163–1442
June	6/18/65	1443–1648

absorption spectra of bacterial spores, 984
acetate synthesis by *Clostridium thermoaceticum*, 1055
Achromobacter, metabolism of, 647
Achromobacter liquefaciens, organism resembling, 905
acid phosphomonoesterase of *Saccharomyces mellis*, 740
acids, *see* amino, deoxyribonucleic, glutamic, mevalonic, nalidixic, nicotinic, nucleic, pyruvic, ribonucleic, 2,4,5-trichlorophenoxyacetic
Actinomyces bovis antigen, 880
Actinomyces naeslundii, metabolism in, 729
actinomycetes, cell-wall composition of, 444
actinomycin D, effect on penicillinase synthesis, 1322
actinophage for *Streptomyces venezuelae*, 240
Actinoplanes, sporangial structure of, 217
Adansonian analysis of *Serratia marcescens*, 454
adenine, in ethionine inhibition of *Salmonella typhimurium*, 1494
adenosine triphosphatase-like activity of myxoviruses, 1526
adenovirus, HeLa cells infected with, 1540
aeration, effect on *Zymononas mobilis*, 1195
Aerobacter aerogenes, metabolism of pentoses by, 129
Aerobacter aerogenes mutants, polyphosphate in, 1262
Agrobacterium tumefaciens, effect of ultraviolet light on infectivity, 1511
Alcaligenes viscolactis, growth of, 1521
Alcaligenes viscolactis, slime production by, 1521
alcohol oxidation by *Corynebacterium* extracts, 1212
aldose dehydrogenase of *Rhodopseudomonas spheroides*, 697
amino acid control of ribonucleic acid synthesis, 706
amino acid utilization by *Alcaligenes viscolactis*, 1521
amino acids, effect on group A hemolytic streptococcus, 421
ω-amino acids, formation by microorganisms, 919
amino acids, shock excretion by brewer's yeast, 960
amniotic membrane, human, polioviral infection of, 470
anaerobic cultivation of microorganisms, 921
anaerobiosis of *Rhodospirillum molischianum*, 403
anthrax toxin, quantitative assay of, 74
antibiotic action of griseofulvin on dermatophytes, 557, 564
antigen, Enterobacteriaceae, destruction of, 1436
antigen, Vi, enzyme degradation of, 1217
antigen, Vi, in tissues of immunized mice, 776
antigen from *Actinomyces bovis*, 880
antigenic activity of myxamoebae, 1092
antigens for production of streptococcal antisera, 141
antigens in β-hemolytic streptococci, 529
antigens of *Listeria monocytogenes*, 84
antigens of psittacosis-lymphogranuloma venereum organisms, 943
antileptospiral activity of normal serum, 1625
antimycin A, action on *Bacillus megaterium*, 1453
D-arabitol production by *Saccharomyces rouxii*, 1186
Arthrobacter terregens, growth-factor requirements, 1617
ascorbic acid, effect of endotoxin on, 922
asparagine-dependent denitrification by *Pseudomonas perfectomarinus*, 1051
aspartic acid in *Actinomyces naeslundii*, 729
Aspergillus oryzae, mannitol in conidia of, 326
assay for penicillinase, 1322
assay, quantitative, for anthrax toxin, 74
autotrophic iron oxidation, 829
auxotrophs of *Bacillus cereus*, 1441
avirulent salmonellae in mice, 1460
Azotobacter, soil, radiation resistance of, 1280

Bacillus anthracis toxin, 74
Bacillus anthracis, effect of hematin on recovery of, 543
Bacillus anthracis, spheroplasts from, 1128
Bacillus cereus, auxotrophs of, 1441
Bacillus cereus, penicillinase synthesis in, 1322
Bacillus cereus, poly-β-hydroxybutyrate from, 245
Bacillus cereus spores, germination of, 1180
Bacillus spores, germination of, 1340
Bacillus licheniformis, inhibition by bacitracin, 415
Bacillus licheniformis, sporulation of, 1506
Bacillus macerans spores, structure of, 1615
Bacillus megaterium, antimycin A action on, 1453
Bacillus megaterium, germination of spores of, 1630
Bacillus megaterium, plasmolysis in, 1151
Bacillus popilliae, electron transport of, 271
Bacillus stearothermophilus, structure of, 855
Bacillus subtilis, bacteriophage deoxyribonucleate infection of, 782
Bacillus subtilis, degradation of ribonucleic acid by, 640
Bacillus subtilis deoxyribonucleic acid, inactivation of, 915

Bacillus subtilis, sporogenesis in, 294
Bacillus subtilis, transformation in, 1314
Bacillus subtilis, transformation system in, 281, 288
Bacillus subtilis, transforming deoxyribonucleic acid in, 1250
Bacillus subtilis, uptake of bases in, 1011
Bacillus subtilis, uptake of nucleosides in, 1011
Bacillus subtilis chromosome, spore markers on, 1065
Bacillus subtilis mutant, thymine-requiring, 262
Bacillus stearothermophilus, bacteriophage from, 175
bacitracin, effect on *Bacillus licheniformis*, 415
bacitracin, in isolation of streptococcal L forms, 1581
bacteriochlorophyll synthesis in *Rhodospirillum molischianum*, 403
bacteriophage, male-specific, in *Proteus mirabilis*, 1231
bacteriophage, streptococcal, lytic enzymes in, 496
bacteriophage deoxyribonucleate infection of *Bacillus subtilis*, 782
bacteriophage for identification of *Pasteurella pestis*, 542
bacteriophage from *Bacillus stearothermophilus*, 175
bacteriophage-infected mycobacteria, lysis of, 537
bacteriophage resistance in *Escherichia coli*, 28
bases, uptake in *Bacillus subtilis*, 1011
basidiomycetes, polyol metabolism in, 954
basidiospore germination in *Schizophyllum commune*, 908
biotin, conversion by *Lactobacillus arabinosus*, 1035
biotin, effect on fatty acid distribution in *Escherichia coli*, 437
blastomycosis, diagnosis of, 748
bovine udders, *Staphylococcus epidermidis* from, 1201
brewer's yeast, shock excretion of amino acids by, 960
Brucella neotomae, host-parasite relationships with, 9
brucellosis, experimental in mice, 9
Burkitt's lymphoma, viral infection in cell line from, 252
butyrate oxidation in *Mycoplasma hominis*, 373

calcium phosphate, chromatography of poliovirus on, 603
Candida albicans, resistance to polyene antibiotics, 1533
capsular material from *Pseudomonas aeruginosa*, 476
carbohydrate antigens in β-hemolytic streptococci, 529
carbohydrate-containing antigen from *Actinomyces bovis*, 880
carbohydrate composition of streptococcal cell walls, 398
carbohydrate pathways in *Escherichia coli*, 1082
carbon dioxide, in *Actinomyces naeslundii* metabolism, 729
carbon dioxide assimilation by *Achromobacter*, 647
carbon dioxide fixation in *Clostridium thermoaceticum*, 1055
carbon dioxide fixation in *Thiobacillus thioparus*, 1041
carbon dioxide incorporation by *Hydrogenomonas facilis*, 839
cationic dyes, absorption by yeast cells, 390
cattle, intestinal flora of, 1244
cell composition, relation to environment, 1026
cell-wall synthesis in *Staphylococcus aureus*, 136
cell walls, actinomycetes, 444
cell walls, action of β-hemolysin on, 378
cell walls, *Escherichia coli*, conjugation factors in, 1478
cell walls, streptococcal, carbohydrate composition of, 398
cell walls, yeast, enzymatic hydrolysis of, 1570
cellular constituents, staining of, 926
cellulase system from *Streptomyces antibioticus*, 23
cellulose oligosaccharides, utilization by *Cellvibrio gilvus*, 113
Cellvibrio gilvus, utilization of cellulose oligosaccharides by, 113
chemolithotrophic growth of *Hydrogenomonas*, 1015
chick interferon, properties of, 462
Chlorobium, deoxyribonucleic acid base composition of, 917
chlorophyll in *Rhodospirillum rubrum*, 1402
chlortetracycline, development of resistance to, 17
cholera vibrio classification, 665
cholera vibrios, non-El Tor, 910
cholesterol, effect on *Mycoplasma laidlawii*, 306
cholesterol in rats, effect of diet on, 47
Chromobacterium violaceum, cyanide formation by, 106
chromosomal aberrations in *Escherichia coli*, 28
chromosomal genes in *Escherichia coli*, 680
chromosome of *Bacillus subtilis*, spore markers on, 1065
classification of staphylococci, 1393
clonal microcolonies of *Escherichia coli*, division in, 513
clostridia, deoxyribonucleic acid base composition of, 1438

Clostridium botulinum, reduced nicotinamide adenine dinucleotide oxidases from, 1499
Clostridium botulinum, toxic moiety from, 1383
Clostridium botulinum type E toxin, 1176
Clostridium novyi, sporulating potency of, 993
Clostridium novyi, toxigenicity of, 993
Clostridium perfringens, in livers of mice, 1623
Clostridium tetani, isolation from soil, 626
Clostridium thermoaceticum, carbon dioxide fixation in, 1055
coagulation, plasma, by microorganisms, 101
coliform enteritis of rabbits, 1
complement-fixation titers in histoplasmosis, 589
conidia of *Aspergillus oryzae*, mannitol in, 326
continuous culture, commensalism in, 693
conjugation factors in *Escherichia coli* cell walls, 1478
conjugation inhibitor from *Escherichia coli*, 89
continuous culture of streptococcus, 421
cortisone, effect on *Mycobacterium leprae*, 365
Corynebacterium, oxidation of alcohols by extracts of, 1212
Corynebacterium diphtheriae, structure in aged cells, 1613
Corynebacterium nephridii, denitrification by, 1104
Coxiella burnetii, effect of influenza A virus on, 1628
cyanide formation by *Chromobacterium violaceum*, 106
cyclic amides, utilization by microorganisms, 919
cystic fibrosis, *Pseudomonas aeruginosa* from, 476
cystine, contaminant in commercial leucine, 1162
cystine dependence in echovirus, 1310
cystine-dependent poliovirus mutants, 1160
cytochrome system in *Haemophilus*, 299
cytochrome system of *Staphylococcus epidermidis*, 675
cytomegalovirus, thermoinactivation of, 671
cytoplasmic membranes, electron microscopy of, 835

Danish type 48 pneumococcus, 1440
Debaromyces hansenii, lipids of, 1488
2-demethyl vitamin K_2, synthesis in *Haemophilus*, 299
denitrification, asparagine-dependent, by *Pseudomonas perfectomarinus*, 1051
denitrification by *Corynebacterium nephridii*, 1104
deoxyribonucleic acid, effect of ethionine on, 687
deoxyribonucleic acid, entry into *Bacillus subtilis*, 281, 288
deoxyribonucleic acid, similarity in *Xanthomonas* and *Pseudomonas*, 1306
deoxyribonucleic acid base composition of *Chlorobium*, 917
deoxyribonucleic acid base composition of clostridia, 1438
deoxyribonucleic acid base composition of *Serratia marcescens*, 454
deoxyribonucleic acid from *Haemophilus influenzae*, 1271
deoxyribonucleic acid in *Bacillus subtilis*, 1250
deoxyribonucleic acid of *Bacillus subtilis*, 915
deoxyribonucleic acid synthesis, inhibition by nalidixic acid, 1068
dermatophytes, action of griseofulvin on, 557, 564
diagnostic dyes for yeasts, 897
6-diazo-5-oxo-L-norleucine inhibition of *Escherichia coli*, 1348
diet, effect on intestinal microflora in rats, 47
division in *Escherichia coli* clonal microcolonies, 513
drug resistance of staphylococci, 967, 988
dyes, cationic, absorption by yeast cells, 390
dyes for diagnosis of respiration deficiency in yeast, 897
dyes for staining of cellular constituents, 926

echovirus type 4 strains, differences in, 1310
egg yolk factor of *Staphylococcus aureus*, 949
Ehrlich ascites cells, effect of mycobacteria on, 205
El Tor vibrios, classification of, 665
electron transport of *Bacillus popilliae*, 271
Elek plate for antitoxin storage, 928
encapsulated *Pseudomonas aeruginosa*, 1432
endogenous reserves in *Streptococcus faecalis*, 1448
endotoxin, effect on liver ascorbic acid of mice, 922
endotoxin, induction of resistance by, 277
endotoxin, interaction with α chains of hemoglobin, 1237
endotoxin, production by *Salmonella typhimurium*, 799
energy production in *Lactobacillus plantarum*, 913
energy supply for *Ferrobacillus ferrooxidans*, 825
enteritis, coliform, of cottontail rabbits, 1
Enterobacteriaceae, penicillin resistance in, 630
Enterobacteriaceae antigen, destruction by *Pseudomonas*, 1436
enterotoxin B, staphylococcal, cell associated, 1155
enterovirus receptors of HeLa cells, 1097
enteroviruses, interaction with HeLa cells, 574
enteroviruses, photodynamic inactivation of, 41
environmental control of *Escherichia coli* cell composition, 1026
enzymatic action on *Pseudomonas aeruginosa* capsular material, 476
enzymatic basis for D-arabitol production, 1186

enzymatic hydrolysis of poly-β-hydroxybutyrate, 234
enzymatic hydrolysis of yeast cell walls, 1570
enzyme, Vi antigen-degrading, 1217
enzyme inhibitor sensitivity, in *Mycobacterium tuberculosis* H37Ra, 1086
enzymes, effect on infectivity of reoviruses, 597
enzymes, effect on interaction of enteroviruses with HeLa cells, 574
enzymes, lytic, in streptococcal bacteriophage, 496
enzymes, *see also* cellulase, β-galactosidase, lipase, neuraminidase, penicillinase, pentulokinases, ribonuclease, transglucosylase, tryptophanase
enzymes, tryptophan biosynthetic in *Neurospora crassa* mutants, 1472
enzymes affecting terpenoid synthesis in *Mycoplasma*, 146
enzymes of glucose catabolism in psittacosis, 810
enzymes of *Rhodopseudomonas spheroides*, 697
ergosterol in *Penicillium atrovenetum*, 409
Escherichia coli, action of nalidixic acid on, 1068
Escherichia coli, bacteriophage resistance in, 28
Escherichia coli, cell growth and division in, 212
Escherichia coli, conjugation inhibitor from, 89
Escherichia coli, 6-diazo-5-oxo-L-norleucine inhibition of, 1348
Escherichia coli, effect of biotin on fatty acids in, 437
Escherichia coli, effect of ethionine on, 687
Escherichia coli, effect of phenethyl alcohol on, 1354, 1370
Escherichia coli, enteropathogenic, detection in fecal cultures, 570
Escherichia coli, environmental control in, 1026
Escherichia coli, F-genotes of, 1231
Escherichia coli, genetic instability in, 712
Escherichia coli, glucose metabolism in, 1082
Escherichia coli, glycine synthesis in, 1145
Escherichia coli, heat effect after chemical treatment, 931
Escherichia coli, infections in rabbits, 1
Escherichia coli, killing by freezing and thawing, 718
Escherichia coli, mating with *Shigella flexneri*, 835
Escherichia coli, operator genes of, 654, 661
Escherichia coli, accumulation of oxytetracycline in, 1335
Escherichia coli, pathogenic, occurrence in swine, 1434
Escherichia coli, recombination in, 1478
Escherichia coli, repression of tryptophanase synthesis in, 996
Escherichia coli, synchrony of division, 513
Escherichia coli, transduction in, 680
Escherichia coli, valine biosynthesis in, 1158
Escherichia coli, X irradiation of, 1032
Escherichia coli mutants, nucleic acid synthesis in, 706
Escherichia coli mutants, protein synthesis in, 706
Escherichia coli mutants, tryptophanase 313, 319, 355
Escherichia coli-Shigella flexneri hybrid, 1374
ethambutol, effect on nucleic acid metabolism, 1299
ethionine, effect on nucleic acids of *Escherichia coli*, 687
ethionine, effect on protein content of *Escherichia coli*, 687
ethionine inhibition of *Salmonella typhimurium*, 1494
exotoxins, effect on reticuloendothelial function, 154

fatty acid distribution in *Escherichia coli*, 437
fatty acid requirement of *Listeria monocytogenes*, 819
fatty acids in *Penicillium atrovenetum*, 409
fecal cultures, enteropathogenic *Escherichia coli* in, 570
Ferrobacillus ferrooxidans, energy supply for, 825
fibroma virus, cell-culture response to, 524
filipin, sensitivity of *Mycoplasma laidlawii* to, 306
flagella, silver impregnation stain for, 899
flagella of *Salmonella typhimurium* spheroplasts, 1586
fluorescein isothiocyanate-labeled γ-globulin, 734
fluorescent-antibody detection of *Escherichia coli*, 570
fluorescent-antibody study of blastomycosis, 748
fluorescent-antibody study of histoplasmosis, 748
fluorescent-antibody study of pathogenic dematiaceous fungi, 551
fluorescent cell-counting neutralization test for psittacosis, 1465
5-fluorouracil, satisfaction of uracil requirement, 1156
Fonsecaea, serological relationships of, 551
fowlpox virus, fine structure of, 1557
freezing and thawing, effect on *Escherichia coli*, 718
fungi, biochemical changes during growth, 409
fungi, fluorescent-antibody study of, 551
fungi, intracellular growth of, 518
fungicidal antibiotic, effect on *Bacillus megaterium*, 1453

β-galactosidase of *Streptococcus lactis*, 937
genetic instability in *Escherichia coli*, 712
genetic map for isoleucine-valine operons, 661
genetic markers, unstable linkage of, 1314
"genetic species" concept in *Xanthomonas*, 95

germination of *Bacillus* spores, 1340
germination of spores, 1180
γ-globulin, isothiocyanate-labeled, 734
glucocorticoids, effect on leukocytes, 1256
glucose catabolism in psittacosis, 810
glucose dissimilation by *Pseudomonas natriegens*, 1209
glucose metabolism in *Escherichia coli*, 1082
glutamic acid in *Actinomyces naeslundii*, 729
glycerol, phosphatidyl, in *Thiobacillus thiooxidans*, 260
glycine-induced nucleotide accumulation in *Staphylococcus aureus*, 1124
glycine synthesis in *Escherichia coli*, 1145
gram-negative bacteria, L forms from, 1443
gram-positive bacteria, L forms from, 1443
griseofulvin, action on dermatophytes, 557, 564
griseofulvin, distribution in *Microsporum gypseum*, 1075

Haemophilus, cytochrome system in, 299
Haemophilus, synthesis of 2-demethyl vitamin K_2 in, 299
Haemophilus influenzae, deoxyribonucleic acid from, 1271
Hansenula wingei, sexually different states in, 1430
HeLa cell monolayers, infectivity of poliovirus for, 52
HeLa cells, enterovirus receptors of, 1097
HeLa cells, interaction with enteroviruses, 574
HeLa cells, radioautography of, 1540
hematin, effect on recovery of *Bacillus anthracis*, 543
hemicellulose, degradation by cellulolytic rumen bacteria, 1515
hemin, effect on cytochrome system of *Staphylococcus epidermidis*, 675
hemoglobin, interaction of α chains and endotoxin, 1237
β-hemolysin, action on cell walls, 378
hemolysin of *Mycoplasma pneumoniae*, 813
herpes simplex virus, thermoinactivation of, 671
hexose monophosphate metabolism in *Schizophyllum commune*, 908
histidine mutants of *Neurospora crassa*, 1472
Histoplasma capsulatum, intracellular growth of, 518
histoplasmin agar-gel bands in histoplasmosis, 589
histoplasmosis, complement-fixation titers in, 589
histoplasmosis, diagnosis of, 748
host-parasite relationships with *Brucella neotomae*, 9
human amniotic membrane, polioviral infection of, 470
human cell line, viral infection in, 252
human leukocytes, effect of glucocorticoids on, 1256
human oral bacteria, neuraminidase activity of, 924
Hydrogenomonas, nickel-dependent growth of, 1015
Hydrogenomonas facilis, carbon dioxide incorporation by, 839
hydroxylysine, incorporation into *Staphylococcus aureus*, 136
Hyphomicrobium, fine structure of, 503

immunity, induction with influenza A virus, 170
immunized mice, Vi antigen in, 776
immunofluorescence, clinical application of, 198
immunofluorescence of cell-associated enterotoxin B, 1155
immunogenic activity of *Mycobacterium tuberculosis* ribosomal fraction, 1291
influenza A virus, heterotypic immunity with, 170
influenza A virus, in *Coxiella burnetii* infections 1628
infrared spectra, taxonomic value of, 546
inhibition of vaccinia virus synthesis, 977
inorganic polyphosphate in *Aerobacter aerogenes* mutants, 1262
interferon, chick, properties of, 462
interferon, effect on L cells, 117
interferon, production by L cells, 117
intestinal flora of cattle, 1244
intestinal infection caused by hybrid strains, 1374
intracellular microbes, growth factors of, 889
irradiation of *Escherichia coli*, 1032
isoleucine, biosynthesis in *Escherichia coli*, 654, 661
isoleucine-valine mutants of *Pseudomonas aeruginosa*, 58

Klebsiella rhinoscleromatis, capsular polysaccharide of, 539
Klebsielleae, nitrogen fixation in, 1482

L cells, interferon production by, 117
L forms, fixation for electron microscopy, 901
L forms, growth on membrane discs, 907
L forms, lipids of, 1020
L forms, metabolism of, 1443
L forms from group A streptococci, 1581
Lactobacillus arabinosus, biotin conversion by, 1035
Lactobacillus plantarum, energy production in, 913
lactose-fermenting *Salmonella typhi*, 1629
lactose-induced β-galactosidase synthesis by *Streptococcus lactis*, 937

Leptospira, silver impregnation stain for, 899
Leptospira pomona, anatomical features of, 223
leptospiral lysis by lipids, 545
leptospires, antileptospiral activity of normal serum, 1625
L-leucine, commercial, contamination of, 1162
leukocytes, effect of glucocorticoids on, 1256
lipase activity of *Staphylococcus aureus* egg yolk factor, 949
lipid changes in virus infection, 1101
lipids of *Debaromyces hansenii*, 1488
lipids of *Proteus* P18, 1020
lipids of *Sarcina lutea*, 768
lipopolysaccharides of *Proteus* P18, 1020
Listeria monocytogenes, fatty acid requirement of, 819
Listeria monocytogenes, surface structures of, 84

M protein, antibodies against, 141
M protein, effect on phagocytosis of *Streptococcus pyogenes*, 583
mannitol in *Aspergillus oryzae* conidia, 326
marine bacteria, isolation of, 903
marine bacteria, taxonomy of, 752
media for typing group A streptococci, 1619
membrane, intracytoplasmic, in *Rhodospirillum rubrum*, 1413, 1421
membrane discs, growth of L forms on, 907
mengopneumonitis agent, enzymes of, 810
mengovirus ribonucleic acid, intracellular fate of, 64
metal chelators as growth factors of *Arthrobacter terregens*, 1617
metal-dipicolinate chelates, in germination of *Bacillus* spores, 1630
methicillin, resistance of staphylococci to, 1005
methionine, contaminant in commercial leucine, 1162
mevalonic acid, biosynthesis by *Mycoplasma*, 146
Micrococcus lysodeikticus, ultraviolet-damaged, 1225
microflora in rats, effect of diet on, 47
Microsporum gypseum, distribution of griseofulvin in, 1075
Microsporum gypseum, uptake of griseofulvin by, 564
milk, leptospiral lysis by lipids of, 545
mixed culture interactions, 693
molybdenum, as micronutrient for *Nitrobacter*, 123
mouse-embryo cells, polyoma virus in, 535
mouse pneumonitis agent, changes associated with chlortetracycline resistance, 17
MS2 bacteriophage in *Proteus mirabilis*, 1231
mushrooms, polyol metabolism in, 954
mutagenic agents, inactivation of deoxyribonucleic acid by, 915
mutant, *Bacillus subtilis*, thymine-requiring, 262
mutants, *Aerobacter aerogenes*, polyphosphate in, 1262
mutants, *Bacillus subtilis*, asporogenous, 294
mutants, *Escherichia coli*, instability of, 712
mutants, *Escherichia coli*, ribonucleic acid synthesis in, 706
mutants, *Escherichia coli*, tryptophanase, 313, 319, 355
mutants, isoleucine-valine, of *Pseudomonas aeruginosa*, 58
mutants, *Neurospora crassa*, 1472
mutation, smooth-rough in *Salmonella minnesota*, 343
mutations to penicillin resistance in Enterobacteriaceae, 630
mycelium of streptomycetes, 159
mycobacteria, cytotoxic effect on Ehrlich ascites cells, 205
mycobacteria, differentiation with nitrite, 1442
mycobacteria, streptomycin induction of lysis, 537
Mycobacterium leprae, effect of cortisone on, 365
Mycobacterium leprae, staining quality and infectivity, 365
Mycobacterium paratuberculosis, growth factors of, 889
Mycobacterium paratuberculosis, mycobactin requirement of, 762
Mycobacterium smegmatis, nucleic acid metabolism in, 1299
Mycobacterium tuberculosis, biosynthesis of nicotinic acid, 540
Mycobacterium tuberculosis, effect on Ehrlich ascites cells, 205
Mycobacterium tuberculosis, ribosomal fraction from, 1291
Mycobacterium tuberculosis H37Ra, 1086
mycobactin requirement of *Mycobacterium paratuberculosis*, 762
Mycoplasma, biosynthesis of mevalonic acid by, 146
Mycoplasma, effect of pH on, 265
Mycoplasma hominis, butyrate oxidation in, 373
Mycoplasma laidlawii, sensitivity to filipin, 306
Mycoplasma pneumoniae, hemolysis of, 813
Mycoplasma pneumoniae, replication in broth cultures, 725
myxamoebae, antigenic activity of, 1097
myxoviruses, adenosine triphosphatase-like activity, 1526

nalidixic acid, action on *Escherichia coli*, 1068
negative-staining method, in fine structure of reovirus, 1140
neomycin activity in serum and plasma, 548
neuraminidase activity of human oral bacteria, 924
Neurospora crassa, histidine mutants of, 1472

nickel-dependent growth of *Hydrogenomonas*, 1015
nicotinamide adenine dinucleotide oxidases, reduced, from *Clostridium botulinum*, 1499
nicotinic acid, biosynthesis by *Mycobacterium tuberculosis*, 540
nitrate metabolism of *Corynebacterium nephridii*, 1104
nitrite, utilization by mycobacteria, 1442
Nitrobacter, comparison with *Nitrosocystis*, 1594
Nitrobacter, requirement for molybdenum, 123
nitrogen-containing antigen from *Actinomyces bovis*, 880
nitrogen fixation by *Achromobacter*, 647
nitrogen fixation by *Klebsielleae*, 1482
nitrogenous substances, release by brewer's yeast, 960
Nitrosocystis oceanus, structure of, 1594
Nitrosomonas, comparison with *Nitrosocystis*, 1594
nodulation factor for *Rhizobium* legume symbiosis, 1134
novobiocin, effect on *Staphylococcus aureus*, 1117
nucleic acid, poliovirus, infectivity of, 52
nucleic acid metabolism in *Mycobacterium smegmatis*, 1299
nucleic acids, *Bacillus subtilis*, nucleoside uptake in, 1011
nucleic acids of *Bacillus subtilis* bacteriophage, 782
nucleosides, uptake in *Bacillus subtilis*, 1011
nucleotide accumulation, glycine-induced, in *Staphylococcus aureus*, 1124
nucleotide accumulation, novobiocin-induced in *Staphylococcus aureus*, 1117
nucleotide pool of *Bacillus licheniformis*, changes during sporulation, 1506

O antigen from *Salmonella minnesota*, 343
oligosaccharides, utilization by *Cellvibrio gilvus*, 113
operator genes for isoleucine-valine operons, 654, 661
oxacillin, resistance of staphylococci to, 1005
oxidation-reduction potential requirement of *Trichomonas vaginalis*, 1610
oxygen control in *Escherichia coli* irradiation, 1032
oxytetracycline in *Escherichia coli*, 1335

pantothenate, effect on *Zymomonas mobilis*, 1195
Pasteurella pestis, bacteriophage for identification of, 542
penicillin resistance in Enterobacteriaceae, 630
penicillinase, assay for, 1322
penicillinase, staphylococcal, effect of 2,4,5-trichlorophenoxyacetic acid on, 1621
Penicillium atrovenetum, fatty acids in, 409
pentitol dehydrogenases, metabolism by *Aerobacter aerogenes*, 129
pentulokinases, metabolism by *Aerobacter aerogenes*, 129
*p*H, effect on *Mycoplasma* strains, 265
phage, *see* bacteriophage
phagocytic function, effect of prednisolone on, 1256
phenethyl alcohol, effect on *Escherichia coli*, 1354, 1370
phosphorylation in *Thiobacillus thioparus*, 1041
photodynamic inactivation of enteroviruses, 41
pigments produced by *Staphylococcus epidermidis*, 1201
plasma, neomycin activity in, 548
plasma coagulation by microorganisms, 101
plasmolysis in *Bacillus megaterium*, 1151
pleuropneumonia-like organisms, replication of, 725
pneumococcus type LXXXII, 1440
polioviral infection of human amniotic membrane, 470
poliovirus, chromatography of, 603
poliovirus, infectivity for HeLa cell monolayers, 52
poliovirus mutants, cystine dependence of, 1160
poly-β-hydroxybutyrate, properties of, 234, 245
polyene antibiotics, *Candida albicans* resistance to, 1533
polyene sensitivity of *Mycoplasma laidlawii*, 306
polyol metabolism in *Schizophyllum commune*, 954
polyoma virus, in infected mouse-embryo cells, 535
polyphosphate fraction of *Saccharomyces mellis*, 740
polyphosphate in *Aerobacter aerogenes* mutants, 1262
polysaccharide, capsular, of *Klebsiella rhinoscleromatis*, 539
prednisolone, effect on phagocytic function, 1256
proflavine inhibition of vaccinia virus synthesis, 977
protein content of *Escherichia coli*, 687
protein production, effect of 5-fluorouracil on, 1156
proteins, antigenic, in virus-infected cells, 1328
Proteus, lipids of, 1020
Proteus mirabilis, bacteriophage in, 1231
Proteus vulgaris, commensalism with *Saccharomyces cerevisiae*, 693
protoplast lysis by bacitracin, 415
protoplasts, electron microscopy of, 855
protoplasts, lysis of, 1387
Pseudomonas, deoxyribonucleic acid in, 1306
Pseudomonas, effect on Enterobacteriaceae antigen, 1436
Pseudomonas aeruginosa, capsular material from, 476

Pseudomonas aeruginosa, encapsulated strains, 1432
Pseudomonas aeruginosa, mutants of, 58
Pseudomonas natriegens, glucose dissimilation by, 1209
Pseudomonas perfectomarinus, enzymatic events in denitrification by, 1051
Pseudomonas piscicida (Bein) Buck, Meyers, and Leifson, taxonomy of, 752
Pseudomonas saccharophila, identity of, 264
pseudorabies virus, protein synthesis in cells infected with, 1328
psittacosis, glucose catabolism in, 810
psittacosis, serological test for, 1465
psittacosis-lymphogranuloma venereum organisms, antigens of, 943
psittacosis virus, association with chlortetracycline resistance, 17
putrefactive anaerobe 3679 spores, 929
pyruvate metabolism by *Achromobacter*, 647
pyruvic acid in capsular polysaccharide of *Klebsiella*, 539

R antigen from *Salmonella minnesota*, 343
rabbits, coliform enteritis of, 1
radiation damage of *Micrococcus lysodeikticus*, 1225
radiation resistance of soil *Azotobacter*, 1280
radioautography of HeLa cells, 1540
radiomimetic chemicals, effect on *Escherichia coli* survival, 931
renal tissue, leptospiral lysis by lipids of, 545
reovirus, infectivity of, 597
reovirus, structure of virion, 1548
reovirus 2, fine structure of, 1140
replication of *Mycoplasma pneumoniae*, 725
replication, velveteen, automotive pistons as bases in, 1627
reproduction in leptospires, 223
resistance, nonspecific, in mice, 277
reticuloendothelial function, depression by exotoxins, 154
Rhizobium legume symbiosis, nodulation factor, 1134
Rhodomicrobium, fine structure of, 503
Rhodopseudomonas spheroides, aldose dehydrogenase of, 697
Rhodospirillum molischianum, bacteriochlorophyll synthesis in, 403
Rhodospirillum rubrum, chlorophyll in, 1402
Rhodospirillum rubrum, enzyme system from, 234
Rhodospirillum rubrum, intracytoplasmic membranes of, 1413, 1421
ribonuclease, action on yeasts, 428
ribonucleic acid, degradation by *Bacillus subtilis*, 640
ribonucleic acid, effect of ethionine on, 687
ribonucleic acid, mengovirus, 64
ribonucleic acid, poliovirus, infectivity of, 52
ribonucleic acid synthesis in *Escherichia coli* mutants, 706
ribose oxidation by *Hydrogenomonas facilis*, 839
ribosomal fraction from *Mycobacterium tuberculosis*, 1291
Rickettsia quintana, fine structure of, 481
rumen bacteria, degradation of hemicellulose by, 1515
rumen bacteria, vitamin requirements of, 1169

Saccharomyces cerevisiae, commensalism with *Proteus vulgaris*, 693
Saccharomyces mellis, polyphosphate accumulation in, 740
Saccharomyces rouxii, D-arabitol production by, 1186
Salmonella, lactose reactions of, 259
Salmonella, pathogenic, occurrence in swine, 1434
Salmonella, sulfide reactions of, 259
Salmonella enteritidis, toxin L from, 193
Salmonella minnesota, smooth-rough mutation in, 343
Salmonella typhi, lactose-fermenting, 1629
Salmonella typhimurium, ethionine inhibition of, 1494
Salmonella typhimurium, toxicity of, 799
Salmonella typhimurium, virulence of, 185
Salmonella typhimurium spheroplasts, flagella of, 1586
salmonellae, isolation from healthy mice, 1460
salmonellosis, experimental, 193
Sarcina lutea, lipids of, 768
Schizophyllum commune, hexose monophosphate metabolism in, 908
Schizophyllum commune, polyol metabolism in, 954
serine, glycine precursor in *Escherichia coli*, 1145
serological test for psittacosis, 1465
Serratia marcescens, Adansonian analysis of, 454
Serratia marcescens, deoxyribonucleic acid base composition of, 454
Serratia marcescens, response to high temperatures, 791
Serratia marcescens endotoxin, induction of resistance by, 277
serum, action of viscid material of *Staphylococcus aureus* with, 874
serum, neomycin activity in, 548
serum, normal, antileptospiral activity of, 1625
sex factor, integrated, effect on *Escherichia coli*, 680
Shigella flexneri, intestinal infection with, 1374
Shigella flexneri mating with *Escherichia coli*, 835
shigellosis, experimental, in rabbits, 803
shigellosis caused by hybrid strains, 1374
slime molds, antigenic activity of, 1092
slime production by *Alcaligenes viscolactis*, 1521
soil, *Clostridium tetani* from, 626

soil *Azotobacter*, radiation resistance of, 1280
spheroplasts, action of ribonuclease on, 428
spheroplasts, lysis of, 1387
spheroplasts, *Salmonella typhimurium*, flagella of, 1586
spheroplasts from *Bacillus anthracis*, 1128
sporangial structure of *Actinoplanes*, 217
spore germination, kinetics of, 1180
spore markers on *Bacillus subtilis* chromosome, 1065
spores, absorption spectra of, 984
spores, *Bacillus*, germination of, 1340
spores, *Bacillus macerans*, structure of, 1615
spores, *Bacillus megaterium*, germination of, 1630
spores, *Clostridium botulinum*, oxidase from, 1499
spores, staining at room temperature, 848
spores of putrefactive anaerobe 3679, 929
sporogenesis in *Bacillus subtilis*, 294
sporulating potency of *Clostridium novyi*, 993
sporulation of *Bacillus licheniformis*, 1506
stain for flagella, 899
stain for *Leptospira*, 899
staining of bacterial spores at room temperature, 848
staining of cellular constituents, 926
staphylococcal cell walls, degradation of, 378
staphylococcal enterotoxin B, cell associated, 1155
staphylococcal β-hemolysin, action on cell walls, 378
staphylococcal L forms, growth on membrane discs, 907
staphylococcal penicillinase, effect of 2,4,5-trichlorophenoxyacetic acid on, 1621
staphylococci, classification of, 1393
staphylococci, drug resistance of, 967, 988
staphylococci, nasal, ecology of, 1163
staphylococci, resistance to methicillin, 1005
staphylococci, resistance to oxacillin, 1005
Staphylococcus aureus, comparison of plasma coagulation by, 101
Staphylococcus aureus, effect of novobiocin on, 1117
Staphylococcus aureus, egg yolk factor of, 949
Staphylococcus aureus, glycine-induced nucleotide accumulation in, 1124
Staphylococcus aureus, incorporation of hydroxylysine, 136
Staphylococcus aureus, transduction to tetracycline resistance, 1286
Staphylococcus aureus, viscid material of, 874
Staphylococcus epidermidis, cytochrome system of, 675
Staphylococcus epidermidis, pigments from, 1201
streptococcal bacteriophage, lytic enzymes in, 496
streptococcal cell walls, carbohydrate composition of, 398
streptococcal cell walls, degradation of, 378
streptococcal M protein, effect on phagocytosis of *Streptococcus pyogenes*, 583
streptococcal α-toxin in bacterial lysis, 1387
streptococci, group A, L forms from, 1581
streptococci, group A, media for typing, 1619
streptococci, group A, sera against, 141
streptococci, β-hemolytic, carbohydrate antigens of, 529
streptococci, β-hemolytic, grouping of, 198
streptococci, host-parasite relationships among, 154
streptococcus, effect of amino acids on, 421
Streptococcus faecalis, endogenous metabolism in, 1448
Streptococcus lactis, β-galactosidase of, 937
Streptococcus pyogenes, phagocytosis of, 583
streptolysin S in bacterial lysis, 1387
Streptomyces antibioticus, cellulase system from, 23
Streptomyces venezuelae, actinophage for, 240
streptomycetes, color of aerial mycelium, 159
streptomycetes, taxonomy of, 331
streptomycin-dependent *Escherichia coli*, valine biosynthesis in, 1158
streptomycin induction of mycobacteria lysis, 537
structural genes for isoleucine-valine operons, 661
structure of *Bacillus macerans* spores, 1615
structure of *Bacillus stearothermophilus*, 855
structure of fowlpox virus, 1557
structure of hyphomicrobia, 503
structure of *Nitrosocystis oceanus*, 1594
structure of *Rickettsia quintana*, 481
succinate metabolism in *Salmonella typhimurium*, 185
surface structures of *Listeria monocytogenes*, 84
survival of chemically treated *Escherichia coli*, 931
symbiosis of *Rhizobium* legume, nodulation factor, 1134

temperature, effect on *Serratia marcescens*, 791
tetracycline resistance, transduction with phage lysates, 967
tetracycline resistance in *Staphylococcus aureus*, 1286
tetrathionate metabolism in *Thiobacillus neapolitanus*, 617
Thiobacillus neapolitanus, metabolism of, 617
Thiobacillus thiooxidans, phosphatidyl glycerol in, 260
Thiobacillus thioparus, carbon dioxide fixation in, 1041
Thiobacillus thioparus, phosphorylation in, 1041
thiol-binding reagents, effect on *Thiobacillus neapolitanus* metabolism, 617
thiosulfate metabolism in *Thiobacillus neapolitanus*, 617
thymine-requiring *Escherichia coli*, 1370
thymine-requiring mutant of *Bacillus subtilis*, 262
toxic moiety from *Clostridium botulinum*, 1383

toxigenicity of *Clostridium novyi*, 993
toxin, *Bacillus anthracis*, assay for, 74
toxin, *Clostridium botulinum* type E, 1176
toxin L, lipid content of, 193
transduction in *Escherichia coli*, 680, 712
transduction of *Staphylococcus aureus* to tetracycline resistance, 1286
transformation in *Bacillus subtilis*, 1314
transforming deoxyribonucleic acid, entry into *Bacillus subtilis*, 281, 288
transforming deoxyribonucleic acid from *Haemophilus influenzae*, 1271
transforming deoxyribonucleic acid in *Bacillus subtilis*, 1250
transglucosylase of *Mycobacterium tuberculosis* H37Ra, 1086
2,4,5-trichlorophenoxyacetic acid, effect on penicillinase, 1621
Trichomonas vaginalis, oxidation-reduction potential, 1610
tryptic activation of *Clostridium botulinum* type E toxin, 1176
tryptophan synthetase in *Escherichia coli*, 355
tryptophanase production in *Escherichia coli* mutants, 313, 319, 355
tryptophanase synthesis, repression in *Escherichia coli*, 996

udder infections, *Staphylococcus epidermidis* in, 1201
ultraviolet damage of *Micrococcus lysodeikticus*, 1225
ultraviolet enhancement of *Agrobacterium tumefaciens* infectivity, 1511
uracil requirement, satisfaction by 5-fluorouracil, 1156

vaccine progeny strains, identification of, 603
vaccinia virus, effect of heat on, 611
vaccinia virus synthesis, proflavine inhibition of, 977
valine, biosynthesis in *Escherichia coli*, 661
valine, biosynthesis in streptomycin-dependent *Escherichia coli*, 1158
valine-requiring mutants of *Pseudomonas aeruginosa*, 58
velveteen replication, automotive pistons as bases in, 1627
Venezuelan equine encephalomyelitis infection, lipid changes in, 1101
Vi antigen-degrading enzyme, 1217
Vi antigen in tissues of immunized mice, 776
Vibrio bubulus, relation to *Vibrio sputorum*, 1109
Vibrio cholerae, classification of, 665
Vibrio comma, classification of, 665
Vibrio fetus, relation to *Vibrio sputorum*, 1109
Vibrio sputorum, biochemistry of, 1109
vibrios, non-El Tor, 910
viral infection in a human cell line, 252
viral infection of amniotic membrane, 470
viral membranes, alteration of, 1526
virion, reovirus, structure of, 1548
virulence of *Shigella flexneri*, 835
virus, echo-, strain differences, 1310
virus, fibroma, cell-culture response to, 524
virus, fowlpox, fine structure of, 1557
virus, herpes simplex, thermoinactivation of, 671
virus, influenza A, heterotypic immunity with, 170
virus, influenza A, in *Coxiella burnetii* infections, 1628
virus, polio, chromatography of, 603
virus, polyoma, in infected mouse-embryo cells, 535
virus, psittacosis, association with chlortetracycline resistance, 17
virus, pseudorabies, protein synthesis in cells infected with, 1328
virus, reo-, infectivity of, 597
virus, reo-, structure of virion, 1548
virus, vaccinia, effect of heat on, 611
virus infection, lipid changes in, 1101
virus nucleic acid, infectivity of, 52
virus ribonucleic acid, intracellular fate of, 64
viruses, effect on interferon production in L cells, 117
viruses, fine structure of reovirus, 1140
viruses, vaccinia, proflavine inhibition of synthesis, 977
viscid-colony strains of *Staphylococcus aureus*, 874
vitamin conversion by *Lactobacillus arabinosus*, 1035
vitamin requirements of cellulolytic rumen bacteria, 1169

wood pigeon mycobacteria, growth factors of, 889

X irradiation of *Escherichia coli*, 1032
Xanthomonas, "genetic species" concept, 95
Xanthomonas deoxyribonucleic acid, 1306

yeast, respiration deficiency in, 897
yeast, shock excretion of amino acids by, 960
yeast cell walls, enzymatic hydrolysis of, 1570
yeast cells, absorption of cationic dyes by, 390
yeast cells, action of ribonuclease on, 428

Zymomonas mobilis, growth yields of, 1195

CONTENTS

No. 1, JANUARY 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Colorimetric Determination of Color of Aerial Mycelium of Streptomycetes. Allister J. Lyons, Jr., and Thomas G. Pridham 159
Time-Lapse Photomicrography of Cell Growth and Division in *Escherichia coli*. Heiner Hoffman and Michael E. Frank 212
Electron Microscopic Observation of the Sporangial Structure of a Strain of *Actinoplanes*. Hubert Lechevalier and Pauline E. Holbert 217
Electron Microscopy of Leptospires. I. Anatomical Features of *Leptospira pomona*. A. E. Ritchie and Herman C. Ellinghausen 223
Identity of *Pseudomonas saccharophila*. N. J. Palleroni and M. Doudoroff 264

Infection and Immunity

Coliform Enteritis of Cottontail Rabbits. Thomas M. Yuill and Robert P. Hanson 1
Host-Parasite Relationships with *Brucella neotomae*. Irvin W. Gibby and Anna M. Gibby 9
Quantitative Assay for Crude Anthrax Toxins. Bertram W. Haines, Frederick Klein, and Ralph E. Lincoln 74
Chemical and Immunological Composition of Surface Structures of *Listeria monocytogenes*. John W. Osebold, Ole Aalund, and Clarence E. Chrisp 84
Plasma Coagulation by Organisms Other Than *Staphylococcus aureus*. Berenice G. Bayliss and Elizabeth R. Hall 101
New Method of Preparing Immunizing Antigens for the Production of Anti-M Sera Against Certain Serotypes of Group A Streptococci. Helen Ashworth and William K. Harrell 141
Host-Parasite Relationships Among Group A Streptococci. III. Depression of Reticuloendothelial Function by Streptococcal Pyrogenic Exotoxins. Edgar E. Hanna and Dennis W. Watson 154
Correlation of Succinate Metabolism and Virulence in *Salmonella typhimurium*. Mendel Herzberg, Mudhaffer J. Jawad, and Darrell Pratt 185
Experimental Salmonellosis. IV. Lipid Content of Toxin L Obtained from *Salmonella enteritidis*. Masaya Kawakami and Susumu Mitsuhashi 193
Clinical Application of Immunofluorescence. I. Grouping β-Hemolytic Streptococci. Thomas B. Smith 198
Cytotoxic Effect of Mycobacteria on Ehrlich Ascites Cells. Adam Bekierkunst and L. Joe Berry 205
Lactose and Sulfide Reactions of an Aberrant *Salmonella* Strain. Jerome M. Bulmash, MacDonald Fulton, and Julio Jiron 259

Genetics and Molecular Biology

Chromosomal Aberrations Associated with Mutations to Bacteriophage Resistance in *Escherichia coli*. Roy Curtiss III 28
Biochemical and Genetic Grouping of Isoleucine-Valine Mutants of *Pseudomonas aeruginosa*. L. E. Pearce and J. S. Loutit 58
Solubilization of the Conjugation Inhibitor from *Escherichia coli* Cell Wall. Gabriel H. Schwartz, Donald Eiler, and Milton Kern 89
"Genetic Species" Concept in *Xanthomonas*. S. Friedman and J. De Ley 95
Transformable Thymine-Requiring Mutant of *Bacillus subtilis*. James L. Farmer and Frank Rothman 262

Microbial Physiology and Metabolism

Multiple Cellulase System from *Streptomyces antibioticus*. M. D. Enger and B. P. Sleeper 23

Effect of High Fat Diets on Intestinal Microflora and Serum Cholesterol in Rats. C. D. Graber, R. M. O'Neal, and E. R. Rabin 47
Cyanide Formation by *Chromobacterium violaceum*. Ruth Michaels and W. A. Corpe 106
Utilization of Cellulose Oligosaccharides by *Cellvibrio gilvus*. Marion L. Schafer and Kendall W. King 113
Molybdenum as a Micronutrient for *Nitrobacter*. M. S. Finstein and C. C. Delwiche 123
Metabolism of Pentoses and Pentitols by *Aerobacter aerogenes*. III. Physical and Immunological Properties of Pentitol Dehydrogenases and Pentulokinases. R. P. Mortlock, D. D. Fossitt, D. H. Petering, and W. A. Wood 129
Incorporation of Hydroxylysine into the Cell Wall and a Cell-Wall Precursor in *Staphylococcus aureus*. W. Grady Smith, Daniel P. Gilboe, and L. M. Henderson 136
Comparative Biosynthesis of Mevalonic Acid by *Mycoplasma*. Paul F. Smith and C. V. Henrikson 146
Morphological Changes in Poly-β-Hydroxybutyrate Granules Associated with Decreased Susceptibility to Enzymatic Hydrolysis. J. M. Merrick, D. G. Lundgren, and R. M. Pfister 234
Characterization of Poly-β-Hydroxybutyrate Extracted from Different Bacteria. D. G. Lundgren, R. Alper, R. H. Marchessault, and C. Schnaitman 245
Phosphatidyl Glycerol in *Thiobacillus thiooxidans*. G. E. Jones and A. A. Benson 260

Virology

Changes in Mouse Pneumonitis Agent Associated with Development of Resistance to Chlortetracycline. James W. Moulder, Dorothy L. Novosel, and Ilse I. E. Tribby 17
Photodynamic Inactivation of Enteroviruses. Craig Wallis and Joseph L. Melnick 41
Infectivity of Poliovirus and Its Nucleic Acid for Dehydrated HeLa Cell Monolayers. Christine E. Smull and E. H. Ludwig 52
Intracellular Fate of Mengo Virus Ribonucleic Acid. M. Homma and A. F. Graham 64
Variations in the Abilities of Several Lines of L Cells to Produce and to Be Affected by Interferon. Royce Z. Lockart, Jr. 117
Induction of Partial Specific Heterotypic Immunity in Mice by a Single Infection with Influenza A Virus. Jerome L. Schulman and Edwin D. Kilbourne 170
Induction and Properties of a Temperate Bacteriophage from *Bacillus stearothermophilus*. N. E. Welker and L. Leon Campbell 175
Electron Microscopic Observations on Actinophages for *Streptomyces venezuelae*. B. G. Painter and S. G. Bradley 240
Evidence for a Persistent Viral Infection in a Cell Derived from Burkitt's Lymphoma. Gertrude Henle and Werner Henle 252

No. 2, February 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Further Taxonomic Studies on Straight to Flexuous Streptomycetes. Thomas G. Pridham and Allister J. Lyons 331
Comparison of the Cell-Wall Composition of Morphologically Distinct Actinomycetes. Tatsuro Yamaguchi 444
Fine Structure of *Rickettsia quintana* Cultivated in Vitro and in the Louse. Susumu Ito and J. W. Vinson 481
Biology of Budding Bacteria. III. Fine Structure of *Rhodomicrobium* and *Hyphomicrobium* spp. S. F. Conti and Peter Hirsch 503
Synchrony of Division in Clonal Microcolonies of *Escherichia coli*. Heiner Hoffman and Michael E. Frank 513
Taxonomic Value of Infrared Spectra. D. N. Wright and W. R. Lockhart 546

Infection and Immunity

Effect of *p*H on Human *Mycoplasma* Strains. Maurice C. Shepard and Carl D. Lunceford 265

Induction of Nonspecific Resistance by Endotoxin in Unresponsive Mice. S. S. Margherita and H. Friedman 277
Biochemical Studies of the Smooth-Rough Mutation in *Salmonella minnesota*. O. Lüderitz, H. J. Risse, H. Schulte-Holthausen, J. L. Strominger, I. W. Sutherland, and O. Westphal 343
Mycobacterium leprae in Mice: Minimal Infectious Dose, Relationship Between Staining Quality and Infectivity, and Effect of Cortisone. Charles C. Shepard and Dorothy H. McRae 365
Purification of Staphylococcal β-Hemolysin and Its Action on Staphylococcal and Streptococcal Cell Walls. William R. Chesbro, Fred P. Heydrick, Roland Martineau, and Gail N. Perkins 378
Enzymatic Action on the Capsular Material Produced by *Pseudomonas aeruginosa* of Cystic Fibrosis Origin. Robert G. Doggett, Gunyon M. Harrison, Richard N. Stillwell, and Everett S. Wallis 476
Intracellular Growth of *Histoplasma capsulatum*. Dexter H. Howard 518
β-Hemolytic Streptococci with Group A and Type II Carbohydrate Antigens. James M. Jablon, Betty Brust, and Milton S. Saslaw 529
Leptospiral Lysis by Lipids of Renal Tissue and Milk. O. H. V. Stalheim 545
Neomycin Activity in Serum and Plasma in the Cylinder Plate Assay. Joseph Fedorko and Sol Katz 548

Genetics and Molecular Biology

Lag Period Characterizing the Entry of Transforming Deoxyribonucleic Acid into *Bacillus subtilis*. James S. Levine and Norman Strauss 281
Configuration of Transforming Deoxyribonucleic Acid During Entry into *Bacillus subtilis*. Norman Strauss 288
Transduction of Sporogenesis in *Bacillus subtilis*. I. Takahashi 294
Isolation of Mutants Affecting Tryptophanase Production in *Escherichia coli*. Theodore K. Gartner and Monica Riley 313
Genetic Analysis of Tryptophanase Mutants of *Escherichia coli*. Theodore K. Gartner and Monica Riley 319
Adansonian Analysis and Deoxyribonucleic Acid Base Composition of *Serratia marcescens*. R. R. Colwell and M. Mandel 454

Microbial Physiology and Metabolism

Electron Transport in *Bacillus popilliae*. Rollin E. Pepper and Ralph N. Costilow 271
Synthesis of 2-Demethyl Vitamin K_2 and the Cytochrome System in *Haemophilus*. David C. White 299
Effect of Cholesterol on the Sensitivity of *Mycoplasma laidlawii* to the Polyene Antibiotic Filipin. Morton M. Weber and Stephen C. Kinsky 306
Mannitol and Mannitol Dehydrogenases in Conidia of *Aspergillus oryzae*. Koki Horikoshi, Shigeji Iida, and Yonosuke Ikeda 326
Formation and Interrelationships of Tryptophanase and Tryptophan Synthetases in *Escherichia coli*. W. Austin Newton and Esmond E. Snell 355
Nature of Butyrate Oxidation by *Mycoplasma hominis*. P. J. VanDemark and P. F. Smith 373
Adsorption of Cationic (Basic) Dyes by Fixed Yeast Cells. Charles H. Giles and Robert B. McKay 390
Studies of Streptococcal Cell Walls. VII. Carbohydrate Composition of Group B Cell Walls. Masako K. Wittner and James A. Hayashi 398
Effect of Oxygen on Growth and the Synthesis of Bacteriochlorophyll in *Rhodospirillum molischianum*. W. R. Sistrom 403
Biochemical Changes During the Growth of Fungi. II. Ergosterol and Fatty Acids in *Penicillium atrovenetum*. James L. Van Etten and David Gottlieb 409
Protoplast Lysis and Inhibition of Growth of *Bacillus licheniformis* by Bacitracin. John E. Snoke and Neal Cornell 415

Effect of Amino Acids on Steady-State Growth of a Group A Hemolytic Streptococcus. Helen C. Davies, Fred Karush, and Joanne H. Rudd 421
Action of Ribonuclease Preparations on Viable Yeast Cells and Spheroplasts. F. Schlenk and J. L. Dainko 428
Effect of Biotin on Fatty Acid Distribution in *Escherichia coli*. John J. Gavin and Wayne W. Umbreit 437
Occurrence of Pyruvic Acid in the Capsular Polysaccharide of *Klebsiella rhinoscleromatis*. R. W. Wheat, Carole Dorsch, and G. Godoy 539
Biosynthesis of Nicotinic Acid by *Mycobacterium tuberculosis*. John N. Albertson, Jr., and Albert G. Moat 540
Effect of Hematin on the Recovery of *Bacillus anthracis* and Related Organisms. Ralph F. Knisely 543

Virology

Physical Properties of Chick Interferon. Leo E. Kreuz and Allan H. Levy 462
Persistent Polioviral Infection of Intact Human Amniotic Membrane Without Apparent Cytopathic Effect. Ion Gresser, Charles Chany, and John F. Enders 470
Observations on the Group C Streptococcal Bacteriophage and Lytic Enzyme System. Eugene N. Fox and Masako K. Wittner 496
Cell-Culture Response to Fibroma Virus. John E. Verna 524
Rosette-Like Arrangement of Polyoma Virus Particles in Infected Mouse-Embryo Cells. Ryoichi Mori, Kazunobu Amako, and Kenji Takeya 535
Streptomycin Induction of Premature Lysis of Bacteriophage-Infected Mycobacteria. Tohru Tokunaga and Margret I. Sellers 537
Stability of Specific Bacteriophage Stored on Filter-Paper Strips for the Rapid Identification of *Pasteurella pestis*. Martin I. Goldenberg and Cleon W. Abbott 542
Errata 549

No. 3, March 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Classification of *Vibrio cholerae* (*Vibrio comma*), Including El Tor Vibrios, by Infrasubspecific Characteristics. John C. Feeley 665
Mixed-Culture Interactions. I. Commensalism of *Proteus vulgaris* with *Saccharomyces cerevisiae* in Continuous Culture. Adnan Shindala, Henry R. Bungay III, Noel R. Krieg, and Kathleen Culbert 693
Factors Affecting the Rate of Killing of *Escherichia coli* by Repeated Freezing and Thawing. Elliot L. Packer, John L. Ingraham, and Stanley Scher 718
Taxonomy of *Pseudomonas piscicida* (Bien) Buck, Meyers, and Leifson. A. J. Hansen, O. B. Weeks, and R. R. Colwell 752
Rapid Methods of Staining Bacterial Spores at Room Temperature. M. D. Lechtman, J. W. Bartholomew, A. Phillips, and M. Russo 848
Electron Microscope Observations on Intact Cells, Protoplasts, and the Cytoplasmic Membrane of *Bacillus stearothermophilus*. Dinah Abram 855
Silver Impregnation Stain for *Leptospira* and Flagella. D. C. Blenden and H. S. Goldberg 899
Fixation of Bacterial L Forms for Electron Microscopy. Claes Weibull and Toshiko Mohri 901
Method for Detecting and Isolating Proteolytic Marine Bacteria. Joseph R. Merkel 903
Isolation of an Organism Resembling *Achromobacter liquefaciens*. W. Tulecke, S. W. Orenski, R. Taggart, and L. Colavito 905
Growth of Staphylococcal L Forms on and Through Membrane Discs of Various Pore Sizes. C. W. Molander, H. J. Weinberger, and B. M. Kagan 907
Isolation of Hemagglutinative Non-El Tor Cholera Vibrios. S. Rizvi, M. I. Huq, and A. S. Benenson 910
Simple Method of Anaerobic Cultivation, with Removal of Oxygen by a Buffered Glucose Oxidase-Catalase System. J. Fabián 921

Staining of Cellular Constituents with May-Greenwald and Giemsa Dyes. Robert I. Sachs and Philip E. Hartman 926
Modified Elek Plate. C. V. Seastone 928
Method for Obtaining Cleaned Putrefactive Anaerobe 3679 Spores. Minoru Uehara, Roger S. Fujioka, and Hilmer A. Frank 929

Infection and Immunity

Application of Fluorescent-Antibody Procedures to the Study of Pathogenic Dematiaceous Fungi. II. Serological Relationships of the Genus *Fonsecaea*. Morris A. Gordon and Yousef Al-Doory 551
Detection of Enteropathogenic *Escherichia coli* in Fecal Cultures by Use of a Modified Fluorescent-Antibody Technique. Alice J. Martin and Margaret O'Brien 570
Effect of Partially Purified Streptococcal M Protein on the In Vitro Phagocytosis of *Streptococcus pyogenes*. Gerald J. Domingue and William A. Pierce, Jr. 583
Relationship of Histoplasmin Agar-Gel Bands and Complement-Fixation Titers in Histoplasmosis. Geraldine L. Wiggins and Joseph H. Schubert 589
Isolation of *Clostridium tetani* from Soil. Ichiro Sanada and Shoki Nishida 626
Mutations to Penicillin Resistance in the Enterobacteriaceae That Affect Sensitivity to Serum and Virulence for the Mouse. Robert J. Roantree and John P. Steward 630
Replication of *Mycoplasma pneumoniae* in Broth Culture. Iolanda E. Low and Monroe D. Eaton 725
Preparation of Fluorescein Isothiocyanate-Labeled γ-Globulin by Dialysis, Gel Filtration, and Ion-Exchange Chromatography in Combination. Robert E. Dedmon, Albert W. Holmes, and Friedrich Deinhardt 734
Correlation of Fluorescent Antibody, Histopathology, and Culture on Tissues from 372 Animals Examined for Histoplasmosis and Blastomycosis. Billie M. Porter, Barbara K. Comfort, Robert W. Menges, Robert T. Habermann, and Coy D. Smith 748
Detection and Persistence of Vi Antigen in Tissues of Actively Immunized Mice. Sidney Gaines, Julius A. Currie, and Joseph G. Tully 776
Growth Rate and Toxicity of *Salmonella typhimurium*. J. W. Shands 799
Use of Ligated Segments of Rabbit Small Intestine in Experimental Shigellosis. H. G. Arm, T. M. Floyd, J. E. Faber, and J. R. Hayes 803
Hemolysin of *Mycoplasma pneumoniae*. Norman L. Somerson, Robert H. Purcell, David Taylor-Robinson, and Robert M. Chanock 813
Interaction of Viscid Material of *Staphylococcus aureus* with Specific Immune Serum. Stuart Mudd and Samuel J. DeCourcy, Jr. 874
Nitrogen-Containing and Carbohydrate-Containing Antigen from *Actinomyces bovis*. E. C. Pirtle, P. A. Rebers, and W. W. Weigel 880
Effect of Endotoxin on Liver Ascorbic Acid of Mice. Charles D. Jeffries 922
Neuraminidase Activity in Mixed Culture Supernatant Fluids of Human Oral Bacteria. J. C. Thonard, C. M. Hefflin, and A. I. Steinberg 924

Genetics and Molecular Biology

Excretion and Degradation of Ribonucleic Acid by *Bacillus subtilis*. A. L. Demain, R. W. Burg, and D. Hendlin 640
Regulatory Mechanisms in the Biosynthesis of Isoleucine and Valine. II. Identification of Two Operator Genes. T. Ramakrishnan and Edward A. Adelberg 654
Regulatory Mechanisms in the Biosynthesis of Isoleucine and Valine. III. Map Order of the Structural Genes and Operator Genes. T. Ramakrishnan and Edward A. Adelberg 661
Effect of Integrated Sex Factor on Transduction of Chromosomal Genes in *Escherichia coli*. James Pittard 680
Effect of Ethionine on the Ribonucleic Acid, Deoxyribonucleic Acid, and Protein Content of *Escherichia coli*. Robert C. Smith and W. D. Salmon 687
Protein and Nucleic Acid Synthesis in Two Mutants of *Escherichia coli* with Temperature-Sensitive Aminoacyl Ribonucleic Acid Synthetases. Lia Eidlic and Frederick C. Neidhardt 706

Genetic Instability in *Escherichia coli*. Norman M. Schwartz 712
Restoration of Virulence to a Strain of *Shigella flexneri* by Mating with *Escherichia coli*. Samuel B. Formal, E. H. LaBrec, H. Schneider, and Stanley Falkow 835
Variety of Diagnostic Dye Mixtures for Respiration Deficiency in Yeast. Susumu Nagai 897
Inactivation of *Bacillus subtilis* Deoxyribonucleic Acid by Mutagenic Agents. Martha K. Canner and John Spizizen 915
Deoxyribonucleic Acid Base Composition of Isolates of the Genus *Chlorobium*. M. Mandel, Janet C. Bergandahl, and N. Pfennig 917

Microbial Physiology and Metabolism

Antibiotic Action of Griseofulvin on Dermatophytes. Moustafa A. El-Nakeeb, W. L. McLellan, Jr., and J. O. Lampen 557
Uptake of Griseofulvin by the Sensitive Dermatophyte, *Microsporum gypseum*. Moustafa A. El-Nakeeb and J. O. Lampen 564
Effect of Thiol-Binding Reagents on the Metabolism of Thiosulfate and Tetrathionate by *Thiobacillus neapolitanus*. P. A. Trudinger 617
Pyruvate Metabolism, Carbon Dioxide Assimilation, and Nitrogen Fixation by an *Achromobacter* Species. I. R. Hamilton, R. H. Burris, P. W. Wilson, and C. H. Wang 647
Effect of Hemin on the Formation of the Cytochrome System of Anaerobically Grown *Staphylococcus epidermis*. N. J. Jacobs and S. F. Conti 675
Cofactor-Dependent Aldose Dehydrogenase of *Rhodopseudomonas spheroides*. Donald J. Niederpruem and Michael Doudoroff 697
Relationship of Carbon Dioxide to Aspartic Acid and Glutamic Acid in *Actinomyces naeslundii*. B. B. Buchanan and Leo Pine 729
Synthesis and Breakdown of the Polyphosphate Fraction and Acid Phosphomonoesterase of *Saccharomyces mellis* and Their Locations in the Cell. Ralph Weimberg and William L. Orton 740
Circumvention of the Mycobactin Requirement of *Mycobacterium paratuberculosis*. Norman E. Morrison 762
Lipids of *Sarcina lutea*. III. Composition of the Complex Lipids. Charles K. Huston, Phillip W. Albro, and Gerald B. Grindey 768
Rhythmic Response of *Serratia marcescens* to Elevated Temperature. Robert L. Dimmick 791
Enzymes of Glucose Catabolism in a Member of the Psittacosis Group. James W. Moulder, Dorothy L. Grisso, and Robert R. Brubaker 810
Volatile Fatty Acid Requirement of a Strain of *Listeria monocytogenes*. A. D. Larson, L. V. Hattier, and C. S. McCleskey 819
Energy Supply for the Chemoautotroph *Ferrobacillus ferrooxidans*. Patrick R. Dugan and Donald G. Lundgren 825
Characteristics and Intermediates of Short-Term $C^{14}O_2$ Incorporation During Ribose Oxidation by *Hydrogenomonas facilis*. Bruce A. McFadden and H. Robert Homann 839
Utilization of External Growth Factors by Intracellular Microbes: *Mycobacterium paratuberculosis* and Wood Pigeon Mycobacteria. William C. Wheeler and John H. Hanks 889
Hexose Monophosphate Metabolism During Basidiospore Germination in *Schizophyllum commune*. Donald J. Niederpruem, Jan Updike, and Lyle Henry 908
Use of Molar Growth Yields for the Evaluation of Energy-Producing Pathways in *Lactobacillus plantarum*. M. S. Oxenburgh and A. M. Snoswell 913
Utilization of Cyclic Amides and Formation of ε-Amino Acids by Microorganisms. Tetsuya Tosa and Ichiro Chibata 919

Virology

Effect of Enzymes on the Interaction of Enteroviruses with Living HeLa Cells. Ihor Zajac and Richard L. Crowell 574
Enzymatic Enhancement of Infectivity of Reovirus. R. S. Spendlove and F. L. Schaffer 597

Chromatography of Poliovirus on Calcium Phosphate and Its Application to the Identification of Vaccine Progeny Strains. Yoshikatsu Ozaki, Arwin R. Diwan, Mizuho Takizawa, and Joseph L. Melnick 603
Effects of Heat on the Infecting, Antibody-Absorbing, and Interfering Powers of Vaccinia Virus. G. J. Galasso and D. G. Sharp 611
Thermoinactivation of Herpes Simplex Virus and Cytomegalovirus. Gordon Plummer and Brian Lewis 671
Bacteriophage Deoxyribonucleate Infection of Competent *Bacillus subtilis*. Bernard E. Reilly and John Spizizen 782

No. 4, April 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Denitrification by *Corynebacterium nephridii*. Lewis T. Hart, A. D. Larson, and C. S. McCleskey 1104
Biochemical Characteristics of *Vibrio sputorum* and Relationship to *Vibrio bubulus* and *Vibrio fetus*. Walter J. Loesche, Ronald J. Gibbons, and Sigmund S. Socransky 1109
Formation of Spheroplasts from *Bacillus anthracis*. B. R. Chatterjee and Robert P. Williams 1128
Plasmolysis in *Bacillus megaterium*. Claes Weibull 1151
Contamination of Commercial L-Leucine Preparations with Methionine and Cystine. Arnold L. Demain 1162

Infection and Immunity

Relationship Between Toxigenicity and Sporulating Potency of *Clostridium novyi*. Shoki Nishida and Gizo Nakagawara 993
Resistance of Coagulase-Positive Staphylococci to Methicillin and Oxacillin. Charles F. Gravenkemper, Jean L. Brodie, and William M. M. Kirby 1005
Serological Analyses of Cellular Slime Mold Development. II. Preferential Loss, During Morphogenesis, of Antigenic Activity Associated with the Vegetative Myxamoebae. D. R. Sonneborn, L. Levine, and M. Sussman 1092
Immunofluorescent Demonstration of Cell-Associated Staphylococcal Enterotoxin B. Mischa E. Friedman and John D. White 1155

Genetics and Molecular Biology

Drug Resistance of Staphylococci. I. Transduction of Tetracycline Resistance with Phage Lysates Obtained from Multiply Resistant Staphylococci. Susumu Mitsuhashi, Hiroshi Oshima, Umeko Kawaharada, and Hajime Hashimoto 967
Drug Resistance of Staphylococci. II. Joint Elimination and Joint Transduction of the Determinants of Penicillinase Production and Resistance to Macrolide Antibiotics. Susumu Mitsuhashi, Hajime Hashimoto, Megumi Kono, and Masato Morimura ... 988
Uptake and Incorporation of Thymine, Thymidine, Uracil, Uridine, and 5-Fluorouracil into the Nucleic Acids of *Bacillus subtilis*. Walter F. Bodmer and Susan Grether .. 1011
Localization of Spore Markers on the Chromosome of *Bacillus subtilis*. I. Takahashi . 1065
Mechanism of Action of Nalidixic Acid on *Escherichia coli*. II. Inhibition of Deoxyribonucleic Acid Synthesis. William A. Goss, William H. Deitz, and Thomas M. Cook .. 1068
Partial Satisfaction of a Uracil Requirement by 5-Fluorouracil. Fred Goodman 1156

Microbial Physiology and Metabolism

Effect of Heat and Plating Medium on Survival of *Escherichia coli* After Treatment with Radiomimetic Chemicals. Antonio Zampieri and Joseph Greenberg 931
β-Galactosidase of *Streptococcus lactis*. J. E. Citti, W. E. Sandine, and P. R. Elliker ... 937
Egg Yolk Factor of *Staphylococcus aureus*. II. Characterization of Lipase Activity. D. B. Shah and J. B. Wilson 949
Polyol Metabolism in the Basidiomycete *Schizophyllum commune*. Donald J. Niederpruem, Amtul Hafiz, and Lyle Henry 954

Release of Nitrogenous Substances by Brewer's Yeast. IV. Energetics in Shock Excretion of Amino Acids. M. J. Lewis and H. J. Phaff 960
Ultraviolet-Absorption Spectra of Dry Bacterial Spores. Glen F. Bailey, Saima Karp, and L. E. Sacks 984
Repression of Tryptophanase Synthesis in *Escherichia coli*. William H. Beggs and Herman C. Lichstein 996
Nickel-Dependent Chemolithotrophic Growth of Two *Hydrogenomonas* Strains. R. Bartha and E. J. Ordal 1015
Comparison of Lipids and Lipopolysaccharide from the Bacillary and L Forms of *Proteus* P18. J. A. Nesbitt III and W. J. Lennarz 1020
Environmental Control of Cell Composition in *Escherichia coli*. D. N. Wright and W. R. Lockhart 1026
X Irradiation of a Sensitive and a Resistant Strain of *Escherichia coli* under Controlled Oxygen Concentrations. A. A. van Soestbergen 1032
Conversion of D-Biotin to Biotin Vitamers by *Lactobacillus arabinosus*. Jerome Birnbaum and Herman C. Lichstein 1035
Coupling of Phosphorylation and Carbon Dioxide Fixation in Extracts of *Thiobacillus thioparus*. Emmett J. Johnson and Harry D. Peck, Jr. 1041
Preliminary Enzymatic Events in Asparagine-Dependent Denitrification by *Pseudomonas perfectomarinus*. Audrey N. Best and W. J. Payne 1051
Incorporation of C^{14} from Carbon Dioxide into Sugar Phosphates, Carboxylic Acids, and Amino Acids by *Clostridium thermoaceticum*. Lars Ljungdahl and Harland G. Wood 1055
Distribution of Griseofulvin Taken up by *Microsporum gypseum:* Complexes of the Antibiotic with Cell Constituents. Moustafa A. El-Nakeeb and J. O. Lampen 1075
Effects of Growth Rate and Limiting Substrate on Glucose Metabolism in *Escherichia coli*. D. N. Wright and W. R. Lockhart 1082
Reversible Effect of Bicarbonate on the Inhibition of Mycobacterial and Yeast Transglucosylases by Mycoribnin. Frank A. Lornitzo and Dexter S. Goldman 1086
Biochemical Effects of Novobiocin on *Staphylococcus aureus*. Rodney M. Wishnow, Jack L. Strominger, Claire H. Birge, and Robert H. Threnn 1117
Nucleotide Accumulation Induced in *Staphylococcus aureus* by Glycine. Jack L. Strominger and Claire H. Birge 1124
Nodulation Factor for *Rhizobium*-Legume Symbiosis. Concepcion L. Valera and M. Alexander 1134
Glycine Synthesis and Metabolism in *Escherichia coli*. Lewis I. Pizer 1145
Biosynthesis of Valine in Streptomycin-Dependent *Escherichia coli*. P. D. Bragg and W. J. Polglase 1158

Virology

Type-Specific Antigens in the Psittacosis-Lymphogranuloma Venereum Group of Organisms. C. E. Ovid Fraser and David T. Berman 943
Proflavine Inhibition of Vaccinia Virus Synthesis. H. Curt Bubel and David A. Wolff 977
Location and Regeneration of Enterovirus Receptors of HeLa Cells. Ihor Zajac and Richard L. Crowell 1097
Lipid Inclusions in L Cells Associated with Venezuelan Equine Encephalomyelitis Virus Infection. Frank M. Hardy and David Arbiter 1101
Fine Structure of Reovirus Type 2. Philip C. Loh, H. R. Hohl, and M. Soergel 1140
Cystine Dependence of Thermoresistant Mutants of Poliovirus. Craig Wallis and Joseph L. Melnick 1160

No. 5, MAY 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Normal Intestinal Flora of Cattle Fed High-Roughage Rations. Leroy R. Maki and Kay Picard 1244
Radiation Resistance of Soil *Azotobacter*. Gerard R. Vela and Orville Wyss 1280

Automatic Classification of Staphylococci by Principal-Component Analysis and a Gradient Method. L. R. Hill, L. G. Silvestri, P. Ihm, G. Farchi, and P. Lanciani 1393
Separation of Phases with Sexually Different States in *Hansenula californica*. J. Santa María 1430
Differentiation of Mycobacteria by Utilization of Nitrite as Sole Nitrogen Source. Michio Tsukamura and Junko Tsukamura 1442

Infection and Immunity

Ecology of Nasal Staphylococci. Nour A. Davis and G. H. G. Davis 1163
Mechanism of Tryptic Activation of *Clostridium botulinum* Type E Toxin. Julia Gerwing, Claude E. Dolman, and Arthur Ko 1176
Spectrophotometric Characterization of Pigments Produced by *Staphylococcus epidermidis* Strains Isolated from Bovine Udders. Olav Sandvik and Richard W. Brown 1201
Preparation and Properties of a Vi Antigen-Degrading Enzyme. Edgar E. Baker and Roberta E. Whiteside 1217
Turbidimetric Changes Accompanying the Interaction of Endotoxin and the α Chains of Human Hemoglobin. Peter Setlow, Lawrence Levine, and Helen Van Vunakis 1237
Failure of Pretreatment with Glucocorticoids to Modify the Phagocytic and Bactericidal Capacity of Human Leukocytes for Encapsulated Type I Pneumococcus. Fred Allison, Jr., and Martha H. Adcock 1256
Immunogenic Activity of a Ribosomal Fraction Obtained from *Mycobacterium tuberculosis*. Anne S. Youmans and Guy P. Youmans 1291
Abortive Intestinal Infection with an *Escherichia coli-Shigella flexneri* Hybrid Strain. Samuel B. Formal, E. H. LaBrec, T. H. Kent, and S. Falkow 1374
Isolation and Characterization of a Toxic Moiety of Low Molecular Weight from *Clostridium botulinum* Type A. Julia Gerwing, Claude E. Dolman, and Hardial S. Bains 1383
Lysis of Bacterial Protoplasts and Spheroplasts by Staphylococcal α-Toxin and Streptolysin S. Alan W. Bernheimer and Lois L. Schwartz 1387
Encapsulated *Pseudomonas aeruginosa* (*Pseudomonas aeruginosa mucosus*) Strains. E. T. Çetin, K. Töreci, and Ö. Anğ 1432
Occurrence in Swine of *Salmonella* and Serotypes of *Escherichia coli* Pathogenic to Man. Don C. Mackel, Lorreine F. Langley, and Charles J. Prchal 1434
Destruction of Common Antigen of Enterobacteriaceae by a Psychrophilic *Pseudomonas*. H. Y. Whang and E. Neter 1436
Pneumococcus Type LXXXII (Danish Type 48). David S. Feingold and Robert Austrian 1440

Genetics and Molecular Biology

Growth of Male-Specific Bacteriophage in *Proteus mirabilis* Harboring F-Genotes Derived from *Escherichia coli*. Kensuke Horiuchi and Edward A. Adelberg 1231
Fate of Transforming Deoxyribonucleic Acid in *Bacillus subtilis*. G. Venema, R. H. Pritchard, and T. Venema-Schröder 1250
Residual Activity of Thermally Denatured Transforming Deoxyribonucleic Acid from *Haemophilus influenzae*. Benjamin J. Barnhart 1271
Transduction of *Staphylococcus aureus* to Tetracycline Resistance In Vivo. Howard Jarolmen, Amedeo Bondi, and Richard L. Crowell 1286
Effect of Ethambutol on Nucleic Acid Metabolism in *Mycobacterium smegmatis* and Its Reversal by Polyamines and Divalent Cations. M. Forbes, N. A. Kuck, and E. A. Peets 1299
Similarity of *Xanthomonas* and *Pseudomonas* Deoxyribonucleic Acid. J. De Ley and S. Friedman 1306
Unstable Linkage Between Genetic Markers in Transformation. M. S. Kelly and R. H. Pritchard 1314
New Assay for Penicillinase and Some Results on Penicillinase Induction. John Imsande 1322

Phenethyl Alcohol. I. Effect on Macromolecular Synthesis of *Escherichia coli*. Herbert S. Rosenkranz, Howard S. Carr, and Harry M. Rose 1354
Phenethyl Alcohol. II. Effect on Thymine-Requiring *Escherichia coli*. Herbert S. Rosenkranz, Howard S. Carr, and Harry M. Rose 1370
Deoxyribonucleic Acid Base Composition of Clostridial Species. Ben'ichiro Tonomura, Richard Malkin, and Jesse C. Rabinowitz 1438
Isolation of Auxotrophs of *Bacillus cereus*. Ivan D. Goldberg, Juin G. Keng, and Curtis B. Thorne 1441

Microbial Physiology and Metabolism

Vitamin Requirements of Several Cellulolytic Rumen Bacteria. H. W. Scott and B. A. Dehority 1169
Kinetics of Spore Germination. Neil G. McCormick 1180
Enzymatic Basis for D-Arabitol Production by *Saccharomyces rouxii*. Jordan M. Ingram and W. A. Wood 1186
Influence of Aeration and of Pantothenate on Growth Yields of *Zymomonas mobilis*. Jean-Pierre Belaïch and Jacques C. Senez 1195
Major Products of Glucose Dissimilation by *Pseudomonas natriegens*. R. G. Eagon and H. W. Cho 1209
Oxidation of Secondary Alcohols by Extracts of a *Corynebacterium*. Eugene Rosenberg and Paul Holmes 1212
Nonphotoreactivating Repair of Ultraviolet Light-Damaged *Micrococcus lysodeikticus* Cells. Robert L. Elder and Roland F. Beers, Jr. 1225
Degradation of Inorganic Polyphosphate in Mutants of *Aerobacter aerogenes*. F. M. Harold and Ruth L. Harold 1262
Effect of Various Conditions on Accumulation of Oxytetracycline in *Escherichia coli*. Kazuo Izaki and Kei Arima 1335
Kinetics of Germination of *Bacillus* Spores. J. C. Vary and H. O. Halvorson 1340
6-Diazo-5-Oxo-L-Norleucine Inhibition of *Escherichia coli*. J. H. Coggin, Jr., and W. R. Martin 1348
Location of Chlorophyll in *Rhodospirillum rubrum*. Stanley C. Holt and Allen G. Marr 1402
Isolation and Purification of the Intracytoplasmic Membranes of *Rhodospirillum rubrum*. Stanley C. Holt and Allen G. Marr 1413
Effect of Light Intensity on the Formation of Intracytoplasmic Membrane in *Rhodospirillum rubrum*. Stanley C. Holt and Allen G. Marr 1421

Virology

Differences in Cystine Dependence and Chromatographic Behavior Between Two Type 4 Echovirus Strains. Craig Wallis and Joseph L. Melnick 1310
Kinetics of Synthesis of Various Types of Antigenic Proteins in Cells Infected with Pseudorabies Virus. Chuya Hamada and Albert S. Kaplan 1328

No. 6, JUNE 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Flagella of *Salmonella typhimurium* Spheroplasts. Z. Vaituzis and R. N. Doetsch 1586
Structure of *Nitrosocystis oceanus* and Comparison with *Nitrosomonas* and *Nitrobacter*. R. G. E. Murray and S. W. Watson 1594
Electron Microscopic Observations of a Remarkable Body in Aged *Corynebacterium diphtheriae*. Tomio Kawata and Terutaka Inoue 1613
Internal Membranous Structure in *Bacillus macerans* spores. L. E. Sacks and R. S. Thomas 1615
Automotive Pistons for Use as Bases in Velveteen Replication. James N. Adams 1627

Infection and Immunity

Significance of Salmonellae Isolated from Apparently Healthy Mice. Josephine A. Morello, Teresa A. DiGenio, and Edgar E. Baker 1460

Isolation of L Forms from Group A Streptococci Exposed to Bacitracin. Jiri Rotta, Walter W. Karakawa, and Richard M. Krause 1581
Growth Media for Typing Group A Streptococci. Robert H. Kremers and Robert W. Quinn 1619
Influence of 2,4,5-Trichlorophenoxyacetic Acid on Staphylococcal Penicillinase. Louis S. Kucera, Herbert S. Goldberg, and Robert N. Goodman 1621
Incidence of *Clostridium perfringens* in the Livers of Conventional and Gnotobiotic Mice. James C. Canada and Dorothy H. Strong 1623
Antileptospiral Activity of "Normal" Serum. Russell C. Johnson and Louis H. Muschel 1625
Laboratory Infection with a Lactose-Fermenting Strain of *Salmonella typhi*. Lawrence J. Kunz and W. H. Ewing 1629

Genetics and Molecular Biology

Increased Activity of Tryptophan Biosynthetic Enzymes in Histidine Mutants of *Neurospora crassa*. M. Carsiotis and Ann M. Lacy 1472
Characterization of Conjugation Factors in *Escherichia coli* Cell Walls. I. Inhibition of Recombination by Cell Walls and Cell Extracts. John H. Lancaster, E. P. Goldschmidt, and Orville Wyss 1478
Enhancement by Adenine of Ethionine-Induced Inhibition of *Salmonella typhimurium*. Robert C. Smith and W. D. Salmon 1494

Microbial Physiology and Metabolism

Metabolic Properties of Some L Forms Derived from Gram-Positive and Gram-Negative Bacteria. Claes Weibull and Hans Gyllang 1443
Synthesis of Reserve Materials for Endogenous Metabolism in *Streptococcus faecalis*. W. W. Forrest and D. J. Walker 1448
Nature of the Bactericidal Action of Antimycin A for *Bacillus megaterium*. Robert E. Marquis 1453
Nitrogen Fixation by Members of the Tribe Klebsielleae. M. C. Mahl, P. W. Wilson, M. A. Fifo, and W. H. Ewing 1482
Lipids of *Debaryomyces hansenii*. Emanuel Merdinger and Edward M. Devine, Jr. 1488
Comparison of Soluble Reduced Nicotinamide Adenine Dinucleotide Oxidases from Cells and Spores of *Clostridium botulinum*. J. H. Green and H. L. Sadoff 1499
Changes in the Nucleotide Pool of *Bacillus licheniformis* During Sporulation. Claus Leitzmann and Robert W. Bernlohr 1506
Photoreversible Ultraviolet Enhancement of Infectivity in *Agrobacterium tumefaciens*. Gary T. Heberlein and James A. Lippincott 1511
Degradation and Utilization of Isolated Hemicellulose by Pure Cultures of Cellulolytic Rumen Bacteria. B. A. Dehority 1515
Amino Acid Utilization by *Alcaligenes viscolactis* for Growth and Slime Production. J. D. Punch, J. C. Olson, Jr., and J. V. Scaletti 1521
Development of Resistance to Polyene Antibiotics in *Candida albicans*. Elias K. Hebeka and Morris Solotorovsky 1533
Enzymatic Hydrolysis of Yeast Cell Walls. I. Isolation of Wall-Decomposing Organisms and Separation and Purification of Lytic Enzymes. Hirosato Tanaka and Herman J. Phaff 1570
Demonstration of a Minimum Oxidation-Reduction Potential Requirement for *Trichomonas vaginalis*. David H. Hollander and John K. Frost 1610
Germination of Spores of *Bacillus megaterium* with Divalent Metal-Dipicolinate Chelates. Murray Jaye and Z. John Ordal 1617
Synthetic Metal Chelators which Replace the Natural Growth-Factor Requirements of *Arthrobacter terregens*. Norman E. Morrison, Alan D. Antoine, and Euline E. Dewbrey 1630

Virology

Fluorescent Cell-Counting Neutralization Test for Psittacosis. Nicholas Hahon and Kenneth O. Cooke 1465

Cytochemical and Electron Microscopical Observations on the Presence and Origin of Adenosine Triphosphatase-Like Activity at the Surface of Two Myxoviruses. C. R. Dawson, M. A. Epstein, and K. Hummeler 1526
Electron Microscopic Radioautography of HeLa Cells Infected with Adenovirus. Carl G. Harford and Alice Hamlin 1540
Reoviruses. II. Structure and Composition of the Virion. Heather D. Mayor, Richard M. Jamison, Liane E. Jordan, and M. Van Mitchell 1548
Fine Structure of the Coat and Nucleoid Material of Fowl-pox Virus. James M. Hyde, Lanelle G. Gafford, and Charles C. Randall 1557
Interference with *Coxiella burnetii* Infections of Guinea Pigs by Influenza A Virus. Robert J. Janssen, Peter J. Gerone, and W. Adrian Chappell 1628
Erratum 1631

EDITORIAL BOARD

L. LEON CAMPBELL, Editor-in-Chief
University of Illinois, Urbana

EDWARD A. ADELBERG, Editor
Yale University, New Haven, Conn.

L. JOE BERRY, Editor
Bryn Mawr College, Bryn Mawr, Pa.

L. S. BARON, Acting Editor
Walter Reed Army Institute of Research, Washington, D.C.

R. D. DeMOSS, Editor
University of Illinois, Urbana

HAROLD S. GINSBERG, Editor
University of Pennsylvania School of Medicine, Philadelphia

ROBERT AUSTRIAN (1969)
Hospital of the University of Pennsylvania, Philadelphia

W. LANE BARKSDALE (1969)
New York University, New York, N.Y.

S. S. BARKULIS (1969)
CIBA Pharmaceutical Products, Inc., Summit, N.J.

L. S. BARON (1969)
Walter Reed Army Institute of Research, Washington, D.C.

ALAN W. BERNHEIMER (1969)
New York University, New York, N.Y.

ROBERT W. BERNLOHR (1970)
University of Minnesota, Minneapolis

S. GAYLEN BRADLEY (1969)
University of Minnesota, Minneapolis

ARNOLD F. BRODIE (1970)
University of Southern California, Los Angeles

ALLAN CAMPBELL (1969)
University of Rochester, Rochester, N.Y.

GEORGE B. CHAPMAN (1969)
Georgetown University, Washington, D.C.

V. P. CIRILLO (1970)
State University of New York, Stony Brook

C. D. COX (1966)
University of Massachusetts, Amherst

WILLIAM J. CROMARTIE (1969)
University of North Carolina School of Medicine, Chapel Hill

A. L. DEMAIN (1969)
Merck & Co., Inc., Rahway, N.J.

JOHN A. DeMOSS (1969)
University of California, San Diego, La Jolla

MICHAEL DOUDOROFF (1969)
University of California, Berkeley

C. W. EMMONS (1966)
National Institutes of Health, Bethesda, Md.

JOHN F. ENDERS (1969)
Harvard University School of Medicine, Boston, Mass.

ELLIS ENGLESBERG (1969)
University of California, Santa Barbara

FRANK B. ENGLEY, JR. (1969)
University of Missouri, Columbia

E. EDWARD EVANS (1966)
University of Alabama Medical Center, Birmingham

A. E. FELLER (1965)
University of Virginia School of Medicine, Charlottesville

WILLIAM W. FERGUSON (1969)
Michigan Department of Health, Lansing

RUTH E. GORDON (1966)
Rutgers, The State University, New Brunswick, N.J.

ANGUS GRAHAM (1969)
Wistar Institute, Philadelphia, Pa.

MAURICE GREEN (1969)
St. Louis University School of Medicine, St. Louis, Mo.

LEONARD HAYFLICK (1969)
Wistar Institute, Philadelphia, Pa.

WERNER HENLE (1969)
Children's Hospital, Philadelphia, Pa.

JAMES G. HIRSCH (1969)
The Rockefeller University, New York, N.Y.

JOHN HOLLAND (1969)
University of California, Irvine

JOHN G. HOLT (1969)
Iowa State University, Ames

PAUL HOWARD-FLANDERS (1969)
Yale University School of Medicine, New Haven, Conn.

JERARD HURWITZ (1969)
Albert Einstein Medical School, New York, N.Y.

ARTHUR G. JOHNSON (1969)
The University of Michigan School of Medicine, Ann Arbor

ELLIOT JUNI (1967)
Emory University, Atlanta, Ga.

R. E. KALLIO (1969)
University of Illinois, Urbana

LLOYD KOZLOFF (1969)
University of Colorado Medical Center, Denver

CARL LAMANNA (1970)
8045 Columbia Pike, Arlington, Va.

J. O. LAMPEN (1965)
Rutgers, The State University, New Brunswick, N.J.

EINAR LEIFSON (1966)
Loyola University School of Medicine, Chicago, Ill.

H. S. LEVINSON (1969)
U.S. Army, Natick Laboratories, Natick, Mass.

H. C. LICHSTEIN (1965)
University of Cincinnati College of Medicine, Cincinnati, Ohio

W. R. LOCKHART (1969)
Iowa State University, Ames

A. G. MARR (1969)
University of California, Davis

ELIZABETH McCOY (1969)
University of Wisconsin, Madison

JOSEPH MELNICK (1969)
Baylor University College of Medicine, Houston, Tex.

FREDERICK C. NEIDHARDT (1969)
Purdue University, Lafayette, Ind.

EVELYN L. OGINSKY (1969)
University of Oregon Medical School, Portland

KENNETH PAIGEN (1969)
Roswell Park Memorial Institute, Buffalo, N.Y.

JAMES T. PARK (1969)
Tufts University, Boston, Mass.

ROBERT C. PARLETT (1969)
George Washington University, Washington, D.C.

MICHAEL J. PELCZAR, JR. (1969)
University of Maryland, College Park

H. J. PHAFF (1969)
University of California, Davis

A. F. RASMUSSEN (1969)
University of California School of Medicine, Los Angeles

ROY REPASKE (1969)
National Institutes of Health, Bethesda, Md.

C. F. ROBINOW (1966)
University of Western Ontario, London, Ontario, Canada

W. R. ROMIG (1969)
University of California, Los Angeles

HARRY M. ROSE (1969)
Columbia University, New York, N.Y.

RUSSELL W. SCHAEDLER (1969)
The Rockefeller University, New York, N.Y.

LOUIS DS. SMITH (1968)
Montana State College, Bozeman

PAUL F. SMITH (1970)
The University of South Dakota, Vermillion

ROGER Y. STANIER (1970)
University of California, Berkeley

CURTIS B. THORNE (1966)
MB Division, Fort Detrick, Frederick, Md.

ROBERT R. WAGNER (1970)
Johns Hopkins University, Baltimore, Md.

LEWIS W. WANNAMAKER (1969)
University of Minnesota, Minneapolis

HELEN R. WHITELEY (1969)
University of Washington, Seattle

J. B. WILSON (1969)
University of Wisconsin, Madison

WILLIS A. WOOD (1969)
Michigan State University, East Lansing

ROBERT A. DAY, Managing Editor, *115 Huron View Boulevard, Ann Arbor, Mich.*

EX OFFICIO

R. D. HOUSEWRIGHT, President (1965–1966)
Fort Detrick, Frederick, Md.

WILLIAM B. SARLES, Vice-President (1965–1966)
The University of Wisconsin, Madison

PHILIPP GERHARDT, Secretary
Michigan State University, East Lansing

H. B. WOODRUFF, Treasurer
Merck & Co., Inc. Rahway, N.J.

SUBJECT INDEX

acetoin metabolism in *Bacillus cereus*, 1251
Achromobacter, cyanide resistance in, 734, 744
Achromobacter, pigment production by, 1686
acid hexose phosphatase of *Escherichia coli*, 837
acid phosphatase, elution from *Saccharomyces mellis*, 82
acridine orange staining of rat virus X14, 1486
acriflavine induction of mitochondrial populations, 481
acriflavine resistance in *Escherichia coli*, 8
adenosine triphosphate, in glucose utilization by psittacosis-trachoma agents, 243
adenosine triphosphate pool in *Streptococcus faecalis*, 1013
adenovirus, simian, release of, 1786
adenovirus, small particle prepared from, 235
adenovirus capsid, structure of, 254
adenovirus-infected cells, tumorlike antigen in, 120
adenovirus strains, antigenic variation in, 292
adenovirus-SV40 hybrid, replication of, 778
adenoviruses, small particles associated with, 271
adrenergic blocking agents, effect on susceptibility to staphylococcal infection, 1001
Aerobacter aerogenes, growth of, 1157
Aerobacter aerogenes, vitamin K in, 561
aflatoxin B_1, effect on cell cultures, 720
agar, action on arboviruses of inhibitor from, 172
Agrobacterium tumefaciens, infectivity of, 1155
air pollutants, biological effects of, 832
Allescheria boydii, growth with antibiotics, 1308
alloxan, diabetes induced by, 1537
amantadine, antiviral activity of, 623
amines, effect on diphtheria toxin, 1552
amino acids, incorporation of C^{14} from, 1569
amino acids, role in postexponential growth, 438
amino acids in *Tetrahymena pyriformis*, 748
aminoacyl-transfer ribonucleic acid in regulation of ribonucleic acid synthesis, 1624
ammonium salts, effect on diphtheria toxin, 1552, 1557
ampicillin, resistance of *Escherichia coli* to, 54
amylases, antigenic relationships among, 1120
Anaplasma marginale, catalase activity in, 309
antibiotics, effect on *Allescheria boydii*, 1308
antibiotics, effect on poly-β-hydroxybutyrate, 965
antibiotics, inhibition of protein synthesis by, 1102, 1109
antibody, Vi, formation in mice, 635
antigen, competence, in pneumococci, 1226
antigen, extraction from streptococci, 667
antigen, somatic, on gram-negative bacteria, 266
antigen, tumorlike, in adenovirus-infected cells, 120
antigenic determinants in *Salmonella*, 302
antigenic variation in adenovirus strains, 292
antigens of *Pasteurella pestis*, 116
antiviral activity of amantadine, 623
D-arabinose, growth of *Aerobacter aerogenes* on, 1157
L-arabinose system, enzyme synthesis in, 946
arboviruses, action of inhibitor from agar on, 172
Arthrobacter, polymer-producing species of, 147
Aspergillus flavus, toxic metabolite from, 720
assay for bacteriophage, 724
auxotrophy, mutation of *Agrobacterium tumefaciens* to, 1155
8-azaguanine, susceptibility of mycobacteria to, 556
azaserine, sensitivity of *Escherichia coli* to, 710

bacillary necrosis of bivalve mollusks, 1036
Bacillus, effect of *m*-tyrosine on, 38
Bacillus, ribonucleic acid cistrons in, 384
Bacillus alvei, effects of constitutive tryptophanase in, 604
Bacillus anthracis, cytotoxicity of culture filtrates, 284
Bacillus anthracis, differential media for, 1778
Bacillus anthracis capsule, structure of, 1082
Bacillus cereus, acid utilization in, 1251
Bacillus cereus, cytotoxicity of culture filtrates, 284
Bacillus cereus, multiple septation in, 1426
Bacillus cereus, phospholipases of, 69
Bacillus cereus, spheroplast formation in, 1355
Bacillus cereus, spodogram of, 453
Bacillus cereus spores, transition into new sporangia, 803
Bacillus licheniformis, auxotrophic mutants of, 558
Bacillus megaterium, gram-positive state of, 643
Bacillus megaterium, ribosomes in, 456
Bacillus megaterium spores, germination of, 827
Bacillus stearothermophilus, changes after bacteriophage induction, 1129
Bacillus subtilis, bacteriophage PBS1 in, 1575
Bacillus subtilis, competence development in, 550
Bacillus subtilis, genetic transformation in, 495
Bacillus subtilis, linkage relationships of genes, 357
Bacillus subtilis, radiation resistance of, 108
Bacillus subtilis, transforming deoxyribonucleic acid in, 343
Bacillus subtilis bacteriophages, 1655
bacteriophage, ribonucleic acid, effect on *Escherichia coli*, 1007

bacteriophage epsilon, transduction of R factors with, 1174
bacteriophage growth in *Escherichia coli*, 648
bacteriophage induction, effect on *Bacillus stearothermophilus*, 1129
bacteriophage infection of *Escherichia coli*, 188
bacteriophage lambda, lysis inhibition by, 1563
bacteriophage lambda-associated enzyme synthesis, 661
bacteriophage lambda deoxyribonucleic acid infection of *Escherichia coli*, 1617
bacteriophage PBS1, location in *Bacillus subtilis*, 1575
bacteriophage R17, effect of 5-fluorouracil on, 928
bacteriophage T2, killing properties of, 724
bacteriophage T4, multiple-tailed, 796
bacteriophage T4 in *Escherichia coli*, 891
bacteriophages, *Bacillus subtilis*, 1655
Bacteroides in culture of *Entamoeba histolytica*, 1045, 1143
Bacteroides ruminicola, heme requirement of, 1645
baker's yeast, intracellular glucose in, 1605
bats, intestinal flora of, 375
benzo[*a*]pyrene, uptake by microorganisms, 989
benzylpenicillin, deacylation of, 380
3,4-benzpyrene, uptake by microorganisms, 989
bile solubility of *Diplococcus pneumoniae*, 549
biotin stimulation of *Nitrobacter agilis*, 729
biotin transport by *Lactobacillus plantarum*, 843, 853
bivalve mollusks, bacillary necrosis of, 1036
blood cultures, use of cephalosporinase in, 830
Brucella abortus, endotoxin of, 895

C^{14}, incorporation into protein by *Clostridium perfringens*, 1569
C-reactive protein, effect on resistance to staphylococcal infection, 1520
canine herpesvirus, electron microscopy of, 1790
carbohydrate catabolism, effect on enzyme synthesis, 23
carbon sources, influence on enzyme synthesis, 15
carbon sources for *Nitrobacter*, 102
catalase activity in *Anaplasma marginale*, 309
catalases of Lactobacillaceae, 347, 352
cell-wall polysaccharide antigen from streptococci, 667
cell walls, lysis by enzyme from myxobacter, 395
cephaloridine, inactivation by *Staphylococcus aureus*, 1599
cephalosporinase, use in blood cultures, 830
cephalothin, inactivation by *Staphylococcus aureus*, 1599
chloramphenicol, *Salmonella typhosa* resistance to, 552
chromatin, nitrogen dioxide fixation in study of, 1710
chromatographic technique for analysis of Gram differentiation, 766
chromatophores of *Rhodopseudomonas spheroides*, 1059
Chromobacterium violaceum, use in determination of L-tryptophan, 1026
chromosome, recombination with F merogenote in *Escherichia coli*, 1664
chromosome replication in *Neisseria meningitidis*, 1182
chromosome synthesis after X irradiation, 1218
Clostridium bifermentans, taxonomy of, 391
Clostridium pasteurianum, pyrophosphatase activity in, 288
Clostridium perfringens, C^{14} incorporation by, 1569
Clostridium perfringens, isolation from gas gangrene, 826
Clostridium perfringens, toxinogenesis of, 1793
Clostridium sordellii, heat-resistant substrains of, 391
cocci, gram-positive, classification of, 136
Coccidioides immitis vaccines, 783
coenzyme A, formation from lactic acid, 984
colicinogenic factor B_1 in *Escherichia coli*, 1276
colonial morphology of *Neurospora crassa*, 1073
competence, development in *Haemophilus influenzae*, 903
competence antigen in pneumococci, 1226
competence in *Neisseria meningitidis*, 1513
competence in transformation of streptococci, 1320
conjugation in *Hansenula wingei*, 1019
Corynebacterium, L forms of, 1467
Corynebacterium, snapping movements of, 783
coryneform bacteria, numerical taxonomy of, 921
Coxiella burnetii, Gram staining of, 834
coxsackievirus A9, multiplication in mouse heart, 546
cyanide resistance in *Achromobacter*, 734, 744
cyclic hydroxamic acids, effect on *Escherichia coli*, 1265
D-cycloserine, resistance in *Escherichia coli*, 1238
cytochrome a_3, formation in *Achromobacter*, 734
cytochrome b_1, reduction in *Escherichia coli*, 1498
cytological location of oxidative assimilation products, 599

deacylation of S^{35}-benzylpenicillin, 380
2-deoxyglucose, effect on *Schizosaccharomyces pombe*, 1032
deoxynucleosides, uptake in pneumococcus type III, 337
deoxynucleotide kinase activity in pneumococci, 327
deoxyribonuclease, extracellular, in *Enterobacteriaceae*, 294
deoxyribonucleic acid, ultraviolet light-damaged, 681

deoxyribonucleic acid from *Neisseria meningitidis*, 1513
deoxyribonucleic acid in *Bacillus subtilis*, 343
deoxyribonucleic acid base composition of gram-positive cocci, 136
deoxyribonucleic acid base composition of myxobacteria, 1795
deoxyribonucleic acid base composition of pseudomonads, 1148
deoxyribonucleic acid base composition of *Pseudomonas piscicida*, 1492
deoxyribonucleic acid infection of *Escherichia coli*, 1617
deoxyribonucleic acid replication after X irradiation, 1218
deoxyribonucleic acid synthesis in *Escherichia coli*, 648
deoxyribonucleic acid synthesis in pneumococci, 327
deoxyribonucleic acid uptake by *Haemophilus influenzae*, 873
deoxyribonucleases, inhibition of *Lactobacillus bulgaricus*, 715
diabetes, effect on rat leukocytes, 1537
dialyzing culture technique for *Mycoplasma*, 1682
Dictyostelium discoideum, food vacuoles of, 755
diet, effect on resistance of mice to *Mycobacterium tuberculosis*, 958
diphosphatidyl glycerol in *Mycoplasma laidlawii*, 282
diphtheria toxin, inhibition by ammonium salts, 1552, 1557
Diplococcus pneumoniae, bile solubility of, 549
Diplococcus pneumoniae, immunological paralysis induced by, 1296
drug resistance of enteric bacteria, 1174

El Tor vibrio carriers, diagnosis of, 824
electron microscopy of canine herpesvirus, 1790
electron microscopy of *Erwinia*, 1054
electron microscopy of murine mycoplasmas, 1750
electron microscopy of *Rhodopseudomonas spheroides*, 1059
electron transport in meningopneumonitis, 1505
electron transport in *Thiobacillus novellus*, 95
endospore, *Bacillus cereus*, spodogram of, 453
endotoxin, susceptibility of mice to, 696
endotoxin, tolerance to, 970
endotoxin bioassay, hypoferremia in, 903
endotoxin-induced resistance to staphylococcal infection, 1520
endotoxin-induced susceptibility to staphylococcal infection, 1001
endotoxin of *Brucella abortus*, 895
endotoxin susceptibility in acute liver injury, 1365
Entamoeba histolytica, *Bacteroides* in culture of, 1045, 1143
enteric bacteria, drug resistance of, 1174
Enterobacteriaceae, extracellular deoxyribonuclease in, 294
Enterobacteriaceae, uptake of benzo[*a*]pyrene by, 989
enterotoxin C, identification of, 1481
enzymatic deacylation of S^{35}-benzylpenicillin, 380
enzymatic degradation of ribosomes, 1
enzyme, salt-requiring, from halophilic bacterium, 312
enzyme from myxobacter, lysis of cell walls by, 395
enzyme synthesis, control in L-arabinose system, 946
enzyme synthesis, in *Pseudomonas fluorescens*, 15, 23
enzyme synthesis, influence of carbon sources on, 15
enzyme synthesis, lambda-associated, 661
enzymes, glyoxylate-condensing, 594
enzymes, halophilic, in extracts of *Halobacterium salinarium*, 1159
enzymes, localization in *Mycoplasma*, 617
Eperythrozoon coccoides, comparison with *Haemobartonella muris*, 1735
Erwinia, cell division in, 1054
Erwinia, numerical taxonomy of, 1638
erythrasma, host-bacterium relationship in, 1489
Escherichia coli, bacteriophage infection of, 648, 1188
Escherichia coli, bacteriophage lambda deoxyribonucleic acid infection of, 1617
Escherichia coli, effect of cyclic hydroxamic acids on, 1265
Escherichia coli, effect of L-α-glycerophosphate on, 1325
Escherichia coli, effect of toluene on, 1420
Escherichia coli, fertility of, 1276
Escherichia coli, filamentous forms of, 223
Escherichia coli, formation of coenzyme A by, 984
Escherichia coli, formic hydrogenlyase in, 673
Escherichia coli, fructose-1,6-diphosphatase in, 837
Escherichia coli, fructose-1,6-diphosphate in, 1150
Escherichia coli, glutamate transport in, 1288
Escherichia coli, inhibition by selenite, 857
Escherichia coli, lysis inhibition in, 891, 1007, 1563
Escherichia coli, lysogeny in derivatives, 446
Escherichia coli, messenger ribonucleic acid in, 1205
Escherichia coli, minimal growth temperature of, 141
Escherichia coli, multiple-tailed phage from, 796
Escherichia coli, postirradiation chromosomal synthesis, 1218
Escherichia coli, protein turnover in, 884, 1578
Escherichia coli, pyridoxine biosynthesis, 431
Escherichia coli, radiation sensitivity of, 1548

Escherichia coli, recombination in, 1664
Escherichia coli, reduction of cytochrome b_1 in, 1498
Escherichia coli, resistance to basic dyes, 8
Escherichia coli, resistance to D-cycloserine, 1238
Escherichia coli, ribonucleic acid synthesis in, 1624
Escherichia coli, sensitivity to azaserine, 710
Escherichia coli, snapping movements of, 789
Escherichia coli, spheroplast formation in, 1355
Escherichia coli, stability of β-galactosidase messenger ribonucleic acid in, 1611
Escherichia coli, suppressor mutations in, 687
Escherichia coli, thymine-requiring mutants of, 554
Escherichia coli, thymine starvation of, 1153
Escherichia coli hybrids, 1496
Escherichia coli mutant, glutamic acid metabolism in, 1304
Escherichia coli mutant, ribonucleoprotein particles in, 403
Escherichia coli mutants, ampicillin-resistant, 54
Escherichia coli mutants, minimal growth temperatures of, 611

F factor in *Escherichia coli*, 1276
F merogenote, in *Escherichia coli*, 1664
fatty acid composition of *Escherichia coli*, 141
fatty acid oxidation in acute liver injury, 1365
fatty acid synthesis in lactobacilli, 1283
fatty acid toxicity for yeast, 126
flagella in *Proteus vulgaris*, 1337
flagella of *Salmonella abortivoequina*, 1096
fluorescent dye for staining spores, 1146
5-fluorouracil, effect on bacteriophage R17, 928
folic acid, in fatty acid synthesis in lactobacilli, 1283
folic acid antagonists, effect on radiation damage, 1548
formic hydrogenlyase, biosynthesis in *Escherichia coli*, 673
fructose-1,6-diphosphate in *Escherichia coli*, 1150
fructose-1,6-diphosphatase of *Escherichia coli*, 837
fungi, nucleic acids of, 1260
fungus, trehalose in spores of, 1589

β-galactosidase messenger ribonucleic acid, stability in *Escherichia coli*, 1611
gamma-irradiation, effect on *Treponema pallidum*, 297
gene C, control of enzyme synthesis by, 946
genetic determinant of dye resistance in *Escherichia coli*, 8
genetic elements governing penicillinase synthesis, 467
genetic mapping in *Salmonella*, 302
genetic mapping of fructose-1, 6-diphosphate, 1150
genetic transformation in *Bacillus subtilis*, 495
germ-free mice, viruslike particles in, 1448
glucose, effect on bacteriophage infection of *Escherichia coli*, 1188
glucose, effect on *Mycoplasma laidlawii*, 1768
glucose, intracellular, in baker's yeast, 1605
glucose dehydrogenase system in *Pediococcus pentosaceus*, 653
glucose utilization by psittacosis-trachoma group, 243
glutamate transport in *Escherichia coli*, 1288
glutamic acid metabolism in *Escherichia coli*, 1304
L-α-glycerophosphate in *Escherichia coli*, 1325
glycolipid from *Mycobacterium marinum*, 262
glycolytic system in *Veillonella*, 164
glyoxylate-condensing enzymes, 594
glyoxylate in *Streptococcus allantoicus*, 1525
Gram differentiation, mechanism of, 766
gram-positive state of *Bacillus megaterium*, 643
Gram stain, effect of ribonucleates on, 1500
Gram staining of *Coxiella burnetii*, 834
gramicidin D, effect on poly-β-hydroxybutyrate, 965
Haemobartonella muris, identity with Sacks agent, 1669, 1735
Haemophilus influenzae, deoxyribonucleic acid uptake by, 873
Haemophilus influenzae, development of competence in, 903
Halobacterium salinarium, enzymes in extracts of, 1159
Halobacterium salinarium, malic dehydrogenase from, 316
halophilic malic dehydrogenase, 312, 316
Hansenula wingei, cell fusion in, 524
Hansenula wingei, changes during conjugation, 1019
heme requirement of *Bacteroides ruminicola*, 1645
herpes simplex virus, persistent infection in vitro, 205
herpesvirus, canine, electron microscopy of, 1790
herpesvirus, thermosensitivity of, 1632
Histoplasma capsulatum, survival in bat feces, 375
hydroxylamine, susceptibility of mycobacteria to, 556
hydroxylysine replacement of lysine, 575
hypoferremia, application to endotoxin bioassay, 903

immunity, cellular, transfer of, 629, 1194
influenza virus, neuraminidases of, 563
interferon, inhibition of poliovirus ribonucleic acid replication, 443
interferon synthesis by RMC poliovirus, 565
iron-deficient *Escherichia coli*, 673

irradiation, effect on chromosome synthesis, 1218
irradiation survival of vaccinia virus, 1138
isoleucine biosynthesis, effect of cyclic hydroxamic acids on, 1265
isoleucine biosynthesis in *Bacillus subtilis*, 357

L cells, synthesis of ribonucleic acid in, 936
L forms, nucleic acid homology with bacteria, 1200
L forms, structure of, 1467
lactic acid, formation of coenzyme A from, 984
lactic acid-forming bacteria, effect on *Vibrio comma*, 541
Lactobacillaceae, catalases in, 347
Lactobacillaceae, lactic dehydrogenase in, 653
lactobacilli, fatty acid synthesis in, 1283
Lactobacillus bulgaricus, inhibition by purine deoxyribonucleotides, 715
Lactobacillus plantarum, biotin transport by, 843, 853
Lactobacillus plantarum, catalase of, 352
lactose-fermenting microorganisms, 560
Lagurus curtatus, susceptibility to *Listeria monocytogenes*, 286
lambda-associated enzyme synthesis, 661
lesion caused by streptococcal cell-wall particles, 1405
leucine biosynthesis in *Bacillus subtilis*, 357
leukemia, mycoplasma from, 517
lipid synthesis in yeast, 227
lipopolysaccharide, effect on mice, 696
Listeria monocytogenes, effect on sage brush vole, 286
liver injury, susceptibility to endotoxin in, 1365
Löwenstein-Jensen medium, nalidixic acid in, 829
luminescent bacteria, in evaluation of air pollutants, 832
lymphocytic choriomeningitis component in rabies virus preparations, 1494
lysine, effect on cell lysis in *Streptococcus faecalis*, 575
lysis inhibition by lambda bacteriophage, 1563
lysis inhibition in *Escherichia coli*, 891, 1007
lysogeny, in derivatives of *Escherichia coli*, 446

malic dehydrogenase from *Halobacterium salinarium*, 316
marine bacteria, filterable, 1713
marine bacteria, numerical taxonomy of, 863
marine organisms, in bacillary necrosis, 1036
mating of *Pseudomonas aeruginosa* strains, 425
measles virus, induction of polykaryocytosis by, 213
measles virus, stabilization of, 132
meningopneumonitis, reduced nicotinamide adenine dinucleotide system in, 1505
mesophilism, bacterial, 50
Micrococcus lysodeikticus extracts, repair of deoxyribonucleic acid by, 681
molds, slime, food vacuoles of, 755
mollusks, bivalve, bacillary necrosis of, 1036
morphology of *Mycoplasma laidlawii*, 1764, 1768
motility in *Bacillus subtilis*, 1575
murine mycoplasmas, microscopy of, 1750
mutant, *Escherichia coli*, glutamic acid metabolism in, 1304
mutant, *Escherichia coli*, ribonucleoprotein particles in, 403
mutant, *Salmonella typhimurium*, 1696
mutants, *Bacillus licheniformis*, auxotrophic, 558
mutants, *Escherichia coli*, ampicillin-resistant, 54
mutants, *Escherichia coli*, filamentous forms of, 223
mutants, *Escherichia coli*, isolation of, 554
mutants, *Escherichia coli*, minimal growth temperatures of, 611
mutants resistant to streptomycin, 1161
mutation to D-cycloserine resistance, 1238
mycobacteria, differentiation of, 556
mycobacteria, effect of oleic acid on, 1438
Mycobacterium leprae, temperature optimum of, 1271
Mycobacterium tuberculosis, resistance of mice to, 958
Mycobacterium tuberculosis, use of organic compounds by, 157
Mycoplasma, culture technique for, 1682
Mycoplasma, enzyme localization in, 617
Mycoplasma, morphology of, 1373
Mycoplasma, nucleic acid homology with bacteria, 1200
Mycoplasma, ultrastructure of, 1387
mycoplasma from human leukemia, 517
Mycoplasma gallisepticum, ultrastructure of, 193
Mycoplasma hominis, ultrastructure of, 180
Mycoplasma laidlawii, diphosphatidylglycerol in, 282
Mycoplasma laidlawii, morphology of, 1764, 1768
Mycobacterium marinum, glycolipid from, 262
Mycoplasma meleagridis, new species from turkeys, 47
Mycoplasma orale, suppression of Rous sarcoma virus by, 534
Mycoplasma pneumoniae, relationship to other mycoplasmas, 1432
Mycoplasma pulmonis, comparison with *Haemobartonella muris*, 1735
mycoplasmas, murine, microscopy of, 1750
mycoplasmas associated with human tumors, 418, 511
Myrothecium verrucaria, trehalose in spores of, 1589
myxobacter, lysis of cell walls by enzyme from, 395
myxobacteria, deoxyribonucleic acid base composition of, 1795

nalidixic acid in Löwenstein-Jensen medium, 829
Neisseria meningitidis, chromosome replication in, 1182
Neisseria meningitidis, deoxyribonucleic acid from, 1513
Neisseria meningitidis, organisms resembling, 560
neuraminidases, substrate specificity of, 563
Neurospora crassa, cell-wall constituents, 1073
Neurospora crassa, inhibition by phenethyl alcohol, 29
Nitrobacter, carbon sources for, 102, 151
Nitrobacter agilis, permeability to organic compounds, 151
Nitrobacter agilis, stimulation by biotin, 729
nitrogen dioxide fixation in bacterial chromatin studies, 1710
Nocardia brasiliensis, polysaccharide of, 571
Nocardia caviae, isolation from soil, 822
nonphotoreactivating repair of deoxyribonucleic acid, 681
nucleic acid, effect on susceptibility to viral infection, 1542
nucleic acid content of *Bacteroides*, 1045
nucleic acid homologies, 1200
numerical taxonomy, 1314
numerical taxonomy of bacteria from seawaters, 863
numerical taxonomy of coryneform bacteria, 921
numerical taxonomy of *Erwinia*, 1638

oleic acid, effect on mycobacteria, 1438
organic compounds, permeability of *Nitrobacter agilis* to, 151
organic compounds, utilization by *Mycobacterium tuberculosis*, 157
ornithosis virus, ultrastructure of, 1387
oxidative assimilation in *Pseudomonas aeruginosa*, 599

Paracoccidioides brasiliensis, transformation of, 504
Pasteurella pestis, antigens of, 116
pathogenicity of *Nocardia caviae*, 822
Pediococcus pentosaceus, oxidative metabolism in, 653
penicillinase, staphylococcal, 589
penicillinase plasmids in *Staphylococcus aureus*, 370
penicillinase synthesis in *Staphylococcus aureus*, 467
peptides, incorporation of C^{14} from, 1569
peptides for toxinogenesis of *Clostridium perfringens*, 1793
phenethyl alcohol, inhibition of *Neurospora crassa* by, 29
phospholipases of *Bacillus cereus*, 69
pigment production by *Achromobacter*, 1686
pleuropneumonia-like orangisms, differentiation from viruses, 180
pneumococcal mutants resistant to streptomycin, 1161
pneumococci, competence in, 1226
pneumococcus, effect of rat leukocytes on, 1537
pneumococcus type III, deoxyribonucleic acid synthesis in, 327
pneumococcus type III, deoxynucleoside uptake in, 337
poliovirus, interferon synthesis by, 565
poliovirus ribonucleic acid replication, effect of interferon on, 443
poly - β - hydroxybutyrate, decomposition by pseudomonads, 1455
poly-β-hydroxybutyrate, enzymatic hydrolysis of, 965
poly-β-hydroxybutyrate metabolism in *Bacillus cereus*, 1251
polykaryocytosis, formation by measles virus infection, 213
polymer-producing species of *Arthrobacter*, 147
polymyxin B, effect on poly-β-hydroxybutyrate, 965
polyoma virus, multiplication of, 819
polysaccharide-lipid complexes from *Veillonella parvula*, 1730
polysaccharide of *Nocardia brasiliensis*, 571
Polysphondyli um pallidum, food vacuoles of, 755
protein, C-reactive, effect on resistance to staphylococcal infection, 1520
protein synthesis, inhibition by polypeptide antibiotics, 1102, 1109
protein turnover in *Escherichia coli*, 884, 1578
Proteus flagella, influence of pH on, 275
Proteus mirabilis, L forms of, 1467
Proteus vulgaris, flagella in, 1337
Proteus vulgaris, inhibition by selenite, 857
protocatechuate oxygenase, synthesis by *Pseudomonas fluorescens*, 15
pseudomonads, decomposition of poly-β-hydroxybutyrate by, 1455
pseudomonads, deoxyribonucleic acid base composition of, 1148
Pseudomonas aeruginosa, endogenous respiration of, 1
Pseudomonas aeruginosa, mating of FP^+ and FP^- strains, 425
Pseudomonas aeruginosa, oxidative assimilation in, 599
Pseudomonas fluorescens, enzyme synthesis in, 15, 23
Pseudomonas indigofera, amino acid incorporation by extracts of, 978
Pseudomonas piscicida, deoxyribonucleic acid base composition of, 1492
Pseudomonas vaccine, 290

psittacosis-trachoma group, glucose utilization by, 243
purine deoxyribonucleotides, inhibition of *Lactobacillus vulgaricus* by, 715
pyridoxine biosynthesis in *Escherichia coli*, 431
pyrophosphatase activity in *Clostridium pasteurianum*, 288

R factors, transduction with bacteriophage epsilon, 1174
radiation damage, effect of folic acid antagonists on, 1548
radiation resistance of *Bacillus subtilis*, 108
reovirus ribonucleic acid, synthesis of, 936
respiratory syncytial virus, inner component of, 1784
Rhodopseudomonas spheroides, chromatophores of, 1059
ribonucleates, effect on Gram stain, 1500
ribonucleic acid, messenger, 1205
ribonucleic acid, messenger, metabolic instability of, 1611
ribonucleic acid cistrons in *Bacillus*, 384
ribonucleic acid phage, effect on lysis-inhibited *Escherichia coli*, 1007
ribonucleic acid synthesis in *Escherichia coli*, 446, 1624
ribonucleic acid synthesis in L cells, 936
ribonucleic acids of fungi, 1260
ribonucleoprotein particles, formation of ribosomes from, 411
ribonucleoprotein particles, in *Escherichia coli* mutants, 403, 411
ribosomes, enzymatic degradation of, 1
ribosomes, formation from precursor ribonucleoprotein particles, 411
ribosomes in *Bacillus megaterium*, 456
ribosomes of *Mycoplasma gallisepticum*, 193
rickettsiae, ultrastructure of, 1387
Rous sarcoma virus, suppression of, 534

Saccharomyces cerevisiae, lipid synthesis in, 227
Saccharomyces cerevisiae, mitochondrial populations in, 481
Saccharomyces mellis, elution of acid phosphatase from, 82
Sacks filterable hemolytic anemia agent, 1669, 1735
sage brush vole, susceptibility to *Listeria monocytogenes*, 286
Salmonella, antigenic determinants in, 302
Salmonella abortivoequina, flagella of, 1096
Salmonella thompson, inhibition by selenite, 857
Salmonella typhimurium, motile mutant of, 1696
Salmonella typhosa, resistance to chloramphenicol, 552
salmonellae, isolation from neotropical bat, 831
salmonellae, lethality for mice, 696
salmonellosis, transfer of immunity to, 629, 1194
salt-requiring enzyme from halophilic bacterium, 312
Schizosaccharomyces pombe, effect of deoxyglucose, 1032
seawaters, numerical taxonomy of bacteria from, 863
sedimentation counting of *Mycoplasma*, 1373
selenite, inhibition of microorganisms by, 857
serine antagonism of *Tetrahymena pyriformis*, 748
serological groupings of *Veillonella*, 704
Serratia marcescens, vitamin K in, 561
sheeppox virus, infection with, 1703
shigellosis, attenuated vaccines against, 63
silicones, use in washing bacteria, 1692
simian adenovirus, release of, 1786
slime molds, food vacuoles of, 755
somatic antigen of gram-negative bacteria, 266
somatic antigen in *Salmonella*, 302
sorbose counterflow, as measurement of glucose in baker's yeast, 1605
spheroplast formation in *Bacillus cereus*, 1355
spheroplast formation in *Escherichia coli*, 1355
Spirillum volutans, in bacteria-free environment, 817
spodogram of Bacillus cereus endospore, 453
sporangia, transition of spores to, 803
spores, *Bacillus megaterium*, germination of, 827
spores, *Bacillus subtilis*, competence development in, 550
spores, fluorescent dye for staining of, 1146
spores, *Myrothecium verrucaria*, trehalose in, 1589
spores, transition to new sporangia, 803
Sporosarcina ureae, electron microscopy of, 808
sporulation of *Bacillus*, effect of *m*-tyrosine on, 38
staining of rat virus, 1486
staining at room temperature, fluorescent dye for, 1146
sulfate ions, use to stabilize measles virus, 132
staphylococcal enterotoxin, new, 1481
staphylococcal infection, endotoxin-induced susceptibility to, 1001
staphylococcal penicillinase, 589
Staphylococcus aureus, endotoxin-induced resistance to, 1520
Staphylococcus aureus, inactivation of cephalosporin antibiotics by, 1599
Staphylococcus aureus, inducible state in, 370
Staphylococcus aureus, L forms of, 1467
Staphylococcus aureus, penicillinase synthesis in, 467
streptococcal cell-wall particles, 1405, 1412
streptococcal mutants resistant to streptomycin, 1161
streptococci, competence in transformation, 1320
streptococci, extraction of antigen from, 667
Streptococcus allantoicus, ureidoglycolate synthetase of, 1525, 1531

Streptococcus faecalis, adenosine triphosphate pool in, 1013
Streptococcus faecalis, cell lysis in, 575
Streptococcus faecalis, effect of amino acids on, 438
Streptococcus lactis, effect of pH on, 1330
streptomycin, mutants resistant to, 1161
streptomycin permease, 1233
structure of *Bacillus anthracis* capsule, 1082
structure of *Bacillus cereus*, 1426
structure of *Sporosarcina ureae*, 808
suppressor-gene action, 687
SV40 genome, effect on adenovirus-SV40, 778
syphilis, experimental, immunity in, 297

taxometric classification of gram-positive cocci, 136
tellurite reduction in yeast, 220
Tetrahymena pyriformis, serine antagonism in, 748
tetrazolium salts, use in electron transport studies, 1505
thermophilism, bacterial, 50
Thiobacillus novellus, thiosulfate oxidation in, 95
thiosulfate oxidation in *Thiobacillus novellus*, 95
thymine-requiring bacteriophage in *Escherichia coli*, 648
thymine-requiring mutants of *Escherichia coli*, 554
thymine starvation of *Escherichia coli*, 1153
thymineless death of *Escherichia coli* hybrids, 1496
tissue reactions to *Coccidioides immitis* vaccines, 783
toluene, effect on *Escherichia coli*, 1420
toxinogenesis of *Clostridium perfringens*, 1793
transfer agent of cellular immunity, 629
transformation in *Bacillus subtilis*, 495
transformation in *Paracoccidioides brasiliensis*, 504
transformation of streptococci, 1320
transformation potential in *Neisseria meningitidis* deoxyribonucleic acid, 1513
trehalose in fungal spores, 1589
Treponema pallidum, effect of γ-irradiation on, 297
L-tryptophan, determination of, 1026
tryptophan, pigment production from, 1686
tryptophanase, effects in *Bacillus alvei*, 604
tuberculosis, effect of diet on resistance to, 958
tuberculosis, resistance of mice to, 1675
tumorlike antigen in adenovirus-infected cells, 120
tumors, human, mycoplasmas associated with, 418
tumors, mycoplasmas associated with, 511
tyrocidine, effect on poly-β-hydroxybutyrate, 965
m-tyrosine, effect on *Bacillus*, 38

ultrastructure of intracellular parasites, 1387
ultrastructure of mycoplasma, 517
ultrastructure of *Mycoplasma gallisepticum*, 193
ultrastructure of *Mycoplasma hominis*, 180
ultraviolet light-damaged deoxyribonucleic acid, 681
ureidoglycolate synthetase of *Streptococcus allantoicus*, 1525, 1531

vaccine, *Pseudomonas*, 290
vaccines, attenuated, against shigellosis, 63
vaccines, *Coccidioides immitis*, 783
vaccinia virus, survival after irradiation, 1138
valine biosynthesis, effect of cyclic hydroxamic acids on, 1265
valine biosynthesis in *Bacillus subtilis*, 357
Veillonella, glycolytic system in, 164
Veillonella, serological groupings of, 704
Veillonella parvula, polysaccharide-lipid complexes from, 1730
Vi antibody, formation in mice, 635
Vi antigen in *Salmonella*, 302
vibrio carriers, diagnosis of, 824
Vibrio comma, effect of lactic acid-forming bacteria on, 541
viral infection, effect of nucleic acid on susceptibility to, 1542
viral subunits from human warts, 278
virus, adenovirus, antigenic variation in, 292
virus, adenovirus, small particle prepared from, 236
virus, adenovirus, structure of capsid, 254
virus, canine herpesvirus, electron microscopy of, 1790
virus, coxsackievirus, multiplication in mouse heart, 546
virus, herpes simplex, persistent infection in vitro, 205
virus, herpesvirus, thermosensitivity of, 1632
virus, influenza, neuraminidases of, 563
virus, measles, induction of polykaryocytosis by, 213
virus, measles, stabilization of, 132
virus, new, from rats, 1719
virus, ornithosis, ultrastructure of, 1387
virus, polyoma, multiplication of, 819
virus, poliovirus, interferon synthesis by, 565
virus, poliovirus, replication of amino acid, 443
virus, rabies, lymphocytic choriomeningitis component in, 1494
virus, rat, acridine orange staining of, 1486
virus, reovirus, ribonucleic acid of, 936
virus, respiratory syncytial, 1784
virus, Rous sarcoma, suppression of, 534
virus, sheeppox, infection with, 1703
virus, simian adenovirus, release of, 1786
virus, vaccinia, survival after irradiation, 1138
viruses, adenoviruses, small particles associated with, 271
viruses, arboviruses, inhibitor of, 172
viruslike particles in germ-free mice, 1448

vitamin K in *Aerobacter aerogenes*, 561
vitamin K in *Serratia marcescens*, 561

washing bacteria by centrifugation through silicones, 1692

L-xylose, growth of *Aerobacter aerogenes* on, 1157

yeast, baker's, intracellular glucose in, 1605
yeast, fatty acid toxicity for, 126
yeast, *Hansenula wingei*, cell fusion in, 524
yeast, *Hansenula wingei*, conjugation in, 1019
yeast, lipid synthesis in, 227
yeast, tellurite reduction in, 220
yeasts, uptake of benzo[*a*]pyrene by, 989
yeast forms of *Paracoccidioides brasiliensis*, 504

INDEX TO DATE OF ISSUE

Month	Date of Issue	Pages
July	7/16/65	1–296
August	8/14/65	297–564
September	9/21/65	565–836
October	10/26/65	837–1160
November	11/20/65	1161–1504
December	12/13/65	1505–1804

CONTENTS

No. 1, July 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Characteristics of *Mycoplasma meleagridis* sp. n., Isolated from Turkeys. R. Yamamoto, C. H. Bigland, and H. B. Ortmayer 47
Agreement Between Deoxyribonucleic Acid Base Composition and Taxometric Classification of Gram-Positive Cocci. L. G. Silvestri and L. R. Hill 136
Polymer-Producing Species of *Arthrobacter*. Helen J. Gasdorf, R. G. Benedict, M. C. Cadmus, R. F. Anderson, and R. W. Jackson 147
Ultrastructure of *Mycoplasma hominis*. Douglas R. Anderson and Michael F. Barile 180
Ultrastructure and Ribosomes of *Mycoplasma galliscepticum*. Jack Maniloff, Harold J. Morowitz, and Russell J. Barrnett 193
Differential Reduction of Tellurite by Growing Colonies of Normal Yeast and Respiration-Deficient Mutants. Susumu Nagai 220

Infection and Immunity

Protection of Monkeys Against Experimental Shigellosis with Attenuated Vaccines. Samuel B. Formal, E. H. LaBrec, Amos Palmer, and Stanley Falkow 63
Characterization of the Phospholipases of *Bacillus cereus* and Their Effects on Erythrocytes, Bone, and Kidney Cells. Milton W. Slein and Gerald F. Logan, Jr. 69
Isolation of Antigens of *Pasteurella pestis*. I. Lipopolysaccharide-Protein Complex and R and S Antigens. Allan R. Larrabee, John D. Marshall, and Dan Crozier 116
Localization of Somatic Antigen on Gram-Negative Bacteria by Electron Microscopy. J. W. Shands 266
Differential Cytotoxicity of *Bacillus anthracis* and *Bacillus cereus* Culture Filtrates. Peter F. Bonventre 284
Susceptibility of the Sage Brush Vole, *Lagurus curtatus*, to *Listeria monocytogenes*. H. J. Welshimer and Nancy G. Winglewish 286
Pseudomonas Vaccine. I. Preparation and Assay. Horacio F. Laborde and Carmen L. de Fajardo 290
Extracellular Deoxyribonucleases in Members of the Family Enterobacteriaceae. Noreen W. Rothberg and Morton N. Swartz 294

Genetics and Molecular Biology

Enzymatic Degradation of Ribosomes During Endogenous Respiration of *Pseudomonas aeruginosa*. Audrey F. Gronlund and J. J. R. Campbell 1
Gene-Controlled Resistance to Acriflavine and Other Basic Dyes in *Escherichia coli*. Hakobu Nakamura 8
Synthesis of Protocatechuate Oxygenase by *Pseudomonas fluorescens* in the Presence of Exogenous Carbon Sources. Jerry J. Kirkland and Norman N. Durham 15
Correlation of Carbohydrate Catabolism and Synthesis of Macromolecules During Enzyme Synthesis in *Pseudomonas fluorescens*. Jerry J. Kirkland and Norman N. Durham 23
Resistance of *Escherichia coli* to Penicillins. I. Genetic Study of Some Ampicillin-Resistant Mutants. Kerstin G. Eriksson-Grennberg, Hans G. Boman, J. A. Torbjörn Jansson, and Sone Thorén 54
Genetic Factors in Radiation Resistance of *Bacillus subtilis*. Stephen Zamenhof, Hela Bursztyn, T. K. Ramachandra Reddy, and Patrice J. Zamenhof 108

Microbial Physiology and Metabolism

Inhibition of Growth, Synthesis, and Permeability in *Neurospora crassa* by Phenethyl Alcohol. Gabriel Lester 29
Effects of *m*-Tyrosine on Growth and Sporulation of *Bacillus* Species. John N. Aronson and Gerald R. Wermus 38

Boundary Between Bacterial Mesophilism and Thermophilism. Howard T. Bausum and Thomas S. Matney 50
Elution of Acid Phosphatase from the Cell Surface of *Saccharomyces mellis* by Potassium Chloride. Ralph Weimberg and William L. Orton 82
Thiosulfate Oxidation and Electron Transport in *Thiobacillus novellus*. M. I. H. Aleem 95
Carbon and Energy Sources for the Nitrifying Autotroph *Nitrobacter*. C. C. Delwiche and M. S. Finstein 102
Mechanisms of Fatty Acid Toxicity for Yeast. A. L. Neal, Joan O. Weinstock, and J. Oliver Lampen 126
Fatty Acid Composition of *Escherichia coli* as a Possible Controlling Factor of the Minimal Growth Temperature. Maxwell K. Shaw and John L. Ingraham 141
Permeability of *Nitrobacter agilis* to Organic Compounds. S. Ida and M. Alexander 151
Kinetics of Utilization of Organic Compounds in the Growth of *Mycobacterium tuberculosis*. Jean A. Bowles and William Segal 157
Truncated Glycolytic System in *Veillonella*. M. Rogosa, M. I. Krichevsky, and F. S. Bishop 164
Growth and Division of Filamentous Forms of *Escherichia coli*. Howard I. Adler and Alice A. Hardigree 223
Nature of Particles Involved in Lipid Synthesis in Yeast. Harold P. Klein 227
Mycoside G, a Specific Glycolipid in *Mycobacterium marinum* (Balnei). R. G. Navalkar, E. Wiegeshaus, E. Kondo, H. K. Kim, and D. W. Smith 262
Influence of *p*H on *Proteus* Flagella. Judith F. M. Hoeniger 275
Diphosphatidyl Glycerol in *Mycoplasma laidlawii*. P. F. Smith, W. L. Koostra, and C. V. Henrikson 282
Stimulation of Pyrophosphatase Activity in *Clostridium pasteurianum* by Reductants. A. J. D'Eustachio, E. Knight, Jr., and R. W. F. Hardy 288

Virology

Characterization of a Tumorlike Antigen in Type 12 and Type 18 Adenovirus-Infected Cells. Zvee Gilead and Harold S. Ginsberg 120
Protection of Measles Virus by Sulfate Ions Against Thermal Inactivation. Fred Rapp, Janet S. Butel, and Craig Wallis 132
Mode of Action of an Inhibitor from Agar on Growth and Hemagglutination of Group A Arboviruses. Julio I. Colón, Jane B. Idoine, Orville M. Brand, and Richard D. Costlow 172
Persistent Herpes Simplex Virus Infection In Vitro with Cycles of Cell Destruction and Regrowth. Berge Hampar and Mary Lou Copeland 205
Mechanism of Polykaryocytosis Associated with Noncytopathic Infection by Measles Virus. John G. Atherton, Sotiros D. Chaparas, Martha Cremer, and Irving Gordon 213
Structure and Composition of a Small Particle Prepared from a Simian Adenovirus. Heather D. Mayor, Richard M. Jamison, Liane E. Jordan, and Joseph L. Melnick 235
Adenosine Triphosphate and Other Requirements for the Utilization of Glucose by Agents of the Psittacosis-Trachoma Group. Emilio Weiss 243
Architecture of the Adenovirus Capsid. Kendall O. Smith, Warren D. Gehle, and Melvin D. Trousdale 254
Association of 20-Millimicron Particles with Adenoviruses. Joseph L. Melnick, Heather D. Mayor, Kendall O. Smith, and Fred Rapp 271
Fine Structure of Unassembled Viral Subunits from Human Warts. K. O. Smith, E. Dougherty, J. L. Melnick, and F. Rapp 278
Antigenic Variation Among Adenovirus Type 12 Strains. Robert R. Rafajko and Janice C. Young 292
Errata 295

No. 2, AUGUST 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Taxonomy of *Clostridium bifermentans* and *Clostridium sordellii*. III. Agglutinability

of Heat-Resistant Substrains of *Clostridium sordellii*. C. T. Huang, Kenzo Tamai, and Shoki Nishida 391
Further Observations on the Spodogram of *Bacillus cereus* Endospore. Georges Knaysi 453
Binding of Ribosomes to Cytoplasmic Reticulum of *Bacillus megaterium*. David Schlessinger, Vincent T. Marchesi, and Benjamin C. K. Kwan 456
Electron Microscopy of Cell Fusion in Conjugating *Hansenula wingei*. S. F. Conti and T. D. Brock 524
Differentiation of Mycobacteria by Susceptibility to Hydroxylamine and 8-Azaguanine. Michio Tsukamura 556

Infection and Immunity

Immunity in Experimental Syphilis. III. Attenuation of Virulent *Treponema pallidum* by γ-Irradiation. James N. Miller 297
Catalase Activity in *Anaplasma marginale*. W. R. Wallace and G. T. Dimopoullos 309
Intestinal Bacterial Flora and Transit Time of Three Neotropical Bat Species. P. D. Klite 375
Lysis of Bacterial Cell Walls by an Enzyme Isolated from a Myxobacter. J. C. Ensign and R. S. Wolfe 395
Transformation of Mycelial and Yeast Forms of *Paracoccidioides brasiliensis* in Cultures and in Experimental Inoculations. Luis M. Carbonell and Joaquín Rodríguez 504
Effects of Lactic Acid-Forming Bacteria on *Vibrio comma* Inoculated into Intestinal Segments of Rabbits. Zenpachiro Hattori, Hiroshi Misawa, Isamu Igarashi, and Yukio Sugiya 541
Rapid Method for Demonstrating Bile Solubility of *Diplococcus pneumoniae*. Clinton V. Z. Hawn and Ellen Beebe 549
Resistance of *Salmonella typhosa* to Chloramphenicol. A. N. Njoku-Obi and J. C. Njoku-Obi 552
Lactose-Fermenting Organisms Resembling *Neisseria meningitidis*. Malcolm S. Mitchell, Dwane L. Rhoden, and Elizabeth O. King 560

Genetics and Molecular Biology

Genetic Mapping of Vi and Somatic Antigenic Determinants in *Salmonella*. E. M. Johnson, Barbara Krauskopf, and L. S. Baron 302
Influence of Deoxyribonucleic Acid Degradation Products and Orthophosphate on Deoxynucleotide Kinase Activity and Deoxyribonucleic Acid Synthesis in Pneumococcus Type III. William Firshein 327
Influence of Deoxyribonucleic Acid Degradation Products and Orthophosphate on Uptake of Deoxynucleosides in Pneumococcus Type III. William Firshein and Bernadette A. Gargan 337
Properties of Newly Introduced Transforming Deoxyribonucleic Acid in *Bacillus subtilis*. G. Venema, R. H. Pritchard, and T. Venema-Schröder 343
Linkage Relationships of Genes Controlling Isoleucine, Valine, and Leucine Biosynthesis in *Bacillus subtilis*. M. Barat, C. Anagnostopoulos, and A.-M. Schneider 357
Dominance of the Inducible State in Strains of *Staphylococcus aureus* Containing Two Distinct Penicillinase Plasmids. Mark H. Richmond 370
Conservation of Ribosomal and Messenger Ribonucleic Acid Cistrons in *Bacillus* Species. Roy H. Doi and Richard T. Igarashi 384
Accumulation of Ribonucleoprotein Particles in a Relaxed Mutant of *Escherichia coli*. Paul S. Sypherd 403
Formation of Ribosomes from Precursor Ribonucleoprotein Particles. Paul S. Sypherd 411
Kinetics of Mating of FP^+ and FP^- Strains of *Pseudomonas aeruginosa*. J. S. Loutit and L. E. Pearce 425
Evidence of Lysogeny in Derivatives of *Escherichia coli*. E. W. Frampton and B. R. Brinkley 446

Nature and Interactions of the Genetic Elements Governing Penicillinase Synthesis in *Staphylococcus aureus*. Richard P. Novick and Mark H. Richmond 467
Acriflavine Induction of Different Kinds of "Petite" Mitochondrial Populations in *Saccharomyces cerevisiae*. Charlotte J. Avers, Cynthia R. Pfeffer, and Martha W. Rancourt 481
Unstable Genetic Transformation in *Bacillus subtilis* and the Mode of Inheritance in Unstable Clones. V. N. Iyer 495
Development of Competence for Transformation Experiments in an Overnight Culture of Germinating Spores of *Bacillus subtilis*. Erela Ephrati-Elizur 550
Improved Method for the Isolation of Thymine-Requiring Mutants of *Escherichia coli*. K. A. Stacey and Eva Simson 554
Different Transforming Characteristics of Colonial Variants from Auxotrophic Mutants of *Bacillus licheniformis*. C. Gomez Leonard and M. J. Mattheis 558

Microbial Physiology and Metabolism

Purification of a Salt-Requiring Enzyme from an Obligately Halophilic Bacterium. P. K. Holmes and H. O. Halvorson 312
Properties of a Purified Halophilic Malic Dehydrogenase. P. K. Holmes and H. Orin Halvorson 316
Distribution and Characteristics of the Catalases of Lactobacillaceae. M. A. Johnston and E. A. Delwiche 347
Isolation and Characterization of the Cyanide-Resistant and Azide-Resistant Catalase of *Lactobacillus plantarum*. M. A. Johnston and E. A. Delwiche 352
Enzymatic Deacylation of S^{35}-Benzylpenicillin. David L. Preuess and Marvin J. Johnson 380
Control of Pyridoxine Biosynthesis in *Escherichia coli*. Walter B. Dempsey 431
Role of Amino Acids in Postexponential Growth. Gerrit Toennies 438
Vitamin K in *Aerobacter aerogenes* and *Serratia marcescens*. R. J. Gibbons and L. P. Engle 561

Virology

Cytopathogenic Mycoplasmas Associated with Two Human Tumors. I. Isolation and Biological Aspects. D. Armstrong, G. Henle, N. L. Somerson, and L. Hayflick 418
Inhibition by Exogenous Interferon of Replication of Poliovirus Ribonucleic Acid in Chick Brain. Julius S. Youngner and Marion E. Kelly 443
Cytopathogenic Mycoplasmas Associated with Two Human Tumors. II. Morphological Aspects. K. Hummeler, D. Armstrong, and N. Tomassini 511
Ultrastructure of a Mycoplasma (Negroni) Isolated from Human Leukemia. Klaus Hummeler, Natale Tomassini, and Leonard Hayflick 517
Suppression of Rous Sarcoma Virus Growth in Tissue Cultures by *Mycoplasma orale*. Norman L. Somerson and M. K. Cook 534
Multiplication of Boston Strains of Coxsackievirus A9 in the Adult Mouse Heart. Francis M. Wilson, Ali Hashimi, and A. Martin Lerner 546
Substrate Specificity of Neurotropic Influenza Virus Neuraminidases. Patricia Jameson and Alvin S. Levine 563
Erratum 564

No. 3, SEPTEMBER 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Relative Contribution of the Cell Wall, Cytoplasmic Membrane, and Cytoplasm to the Gram-Positive Characteristic of *Bacillus megaterium*. J. W. Bartholomew and Thomas Cromwell 643
The Genus *Veillonella*. IV. Serological Groupings, and Genus and Species Emendations. M. Rogosa 704
Nature and Development of Membrane Systems in Food Vacuoles of Cellular Slime Molds Predatory upon Bacteria. Hans R. Hohl 755
Analysis of the Mechanism of Gram Differentiation by Use of a Filter-Paper Chro-

matographic Technique. J. W. Bartholomew, Thomas Cromwell, and Richard Gan 766
Time-Lapse Photomicrography of Lashing, Flexing, and Snapping Movements in *Escherichia coli* and *Corynebacterium* Microcultures. Heiner Hoffman and Michael E. Frank 789
Electron Microscopy of Ultrathin Sections of *Sporosarcina ureae*. K. Mazanec, M. Kocur, and T. Martinec 808
Cultivation of *Spirillum volutans* in a Bacteria-Free Environment. J. S. Wells, Jr., and Noel R. Krieg 817
Nalidixic Acid as a Decontaminant in Löwenstein-Jensen Medium. Howard Gruft ... 829
Evaluation of Biological Effects of Air Pollutants by Use of Luminescent Bacteria. William F. Serat, Fred E. Budinger, Jr., and Peter K. Mueller 832
Gram Staining of *Coxiella burnetii*. Domingo G. Giménez 834

Infection and Immunity

Immunochemistry of the Group-Specific Polysaccharide of *Nocardia brasiliensis*. Sergio Estrada-Parra, Abel Zamora, and L. F. Bojalil 571
In Vivo Studies on Staphylococcal Penicillinase. Luc Eyckmans and Ralph Tompsett .. 589
Experimental Salmonellosis. VI. In Vitro Transfer of Cellular Immunity of Mouse Mononuclear Phagocytes. Kazuko Saito and Susumu Mitsuhashi 629
Factors Affecting Formation of Incomplete Vi Antibody in Mice. Sidney Gaines, Julius A. Currie, and Joseph G. Tully 634
Extraction of Cell-Wall Polysaccharide Antigen from Streptococci. Hutton D. Slade .. 667
High Susceptibility of Strain A Mice to Endotoxin and Endotoxin-Red Blood Cell Mixtures. Gloria Heppner and David W. Weiss 696
Influence of Inoculum Media on Sensitivity of *Escherichia coli* to Azaserine. Annie J. Narkates and Robert F. Pittillo 710
Effect of Aflatoxin B_1 on Cell Cultures. J. Gabliks, W. Schaeffer, L. Friedman, and G. Wogan 720
Control of Tissue Reactions in Monkeys Vaccinated with Viable *Coccidioides immitis* by Prevaccination with Killed *Coccidioides immitis*. J. L. Converse, G. A. Deauville, E. M. Snyder, J. G. Ray, and M. E. Seaquist 783
Isolation of *Nocardia caviae* from Soil and Its Pathogenicity for Laboratory Animals. P. V. Kurup and R. S. Sandhu 822
New Method for Early Diagnosis of Celebes Type El Tor *Vibrio* Carriers. Kenji Takeya, Shoichi Shimodori, and Yutaka Zinnaka 824
Isolation of *Clostridium perfringens* Type D from a Case of Gas Gangrene. Gosaku Morinaga, Tomio Nakamura, Jun Yoshizawa, and Shoki Nishida 826
Use of Cephalosporinase in Blood Cultures. Te-Wen Chang and Louis Weinstein 830
Isolation of Salmonellae from a Neotropical Bat. P. D. Klite and Miguel Kourany ... 831

Genetics and Molecular Biology

Phage Growth and Deoxyribonucleic Acid Synthesis in *Escherichia coli* Infected by a Thymine-Requiring Bacteriophage. Christopher K. Mathews 648
Repression of λ-Associated Enzyme Synthesis After λ_{vir} Superinfection of Lysogenic Hosts. Arnold L. Lisio and Arthur Weissbach 661
Nonphotoreactivating Repair of Ultraviolet Light-Damaged Transforming Deoxyribonucleic Acid by *Micrococcus lysodeikticus* Extracts. Robert L. Elder and Roland F. Beers, Jr. 681
Mechanism Studies of Supressor-Gene Action. Stuart Brody and Charles Yanofsky .. 687

Microbial Physiology and Metabolism

Replacement of Lysine by Hydroxylysine and Its Effects on Cell Lysis in *Streptococcus faecalis*. Gerald D. Shockman, J. Stuart Thompson, and Margaret J. Conover ... 575
Heterogeneity of the Glyoxylate-Condensing Enzymes. Warner S. Wegener, Henry C. Reeves, and Samuel J. Ajl 594
Cytological Distribution of the Products of Oxidative Assimilation in *Pseudomonas aeruginosa*. Geraldine A. Tomlinson and J. J. R. Campbell 599

Physiological Effects of a Constitutive Tryptophanase in *Bacillus alvei*. J. A. Hoch and R. D. DeMoss 604
Mutants of *Escherichia coli* with High Minimal Temperatures of Growth. Gerard A. O'Donovan, Catherine L. Kearney, and John L. Ingraham 611
Localization of Enzymes in *Mycoplasma*. J. D. Pollack, Shmuel Razin, and Robert C. Cleverdon 617
Oxidative Metabolism in *Pediococcus pentosaceus*. III. Glucose Dehydrogenase System. Chin K. Lee and Walter J. Dobrogosz 653
Induced Biosynthesis of Formic Hydrogenlyase in Iron-Deficient Cells of *Escherichia coli*. T. Fukuyama and E. J. Ordal 673
Inhibition of Growth of *Lactobacillus bulgaricus* by Purine Deoxyribonucleotides. George K. Morris and William L. Williams 715
Stimulation of *Nitrobacter agilis* by Biotin. Terry A. Krulwich and Helen B. Funk ... 729
Cyanide Resistance in *Achromobacter*. I. Induced Formation of Cytochrome a_2 and Its Role in Cyanide-Resistant Respiration. Kei Arima and Tetuo Oka 734
Cyanide Resistance in *Achromobacter*. I. Mechanism of Cyanide Resistance. Tetuo Oka and Kei Arima 744
Free Amino Acids in Serine-Antagonized Cells of *Tetrahymena pyriformis*. June B. Wragg, Howard Reynolds, and Michael J. Pelczar, Jr. 748
Direct Transition of Outgrowing Bacterial Spores to New Sporangia without Intermediate Cell Division. Vladimir Vinter and Ralph A. Slepecky 803
Concurrent Heat Activation and Suppression of *Bacillus megaterium* Spore Germination. P. K. Holmes, Ella H. Nags, and Hillel S. Levinson 827

Virology

Plaque Development and Induction of Interferon Synthesis by RMC Poliovirus. Terry C. Johnson and Leroy C. McLaren 565
Mode of Action of the Antiviral Activity of Amantadine in Tissue Culture. C. E. Hoffman, E. M. Neumayer, R. F. Haff, and R. A. Goldsby 623
Assay for the Killing Properties of T2 Bacteriophage and Their "Ghosts." Donna H. Duckworth and Maurice J. Bessman 724
Influence of SV40 Genome on the Replication of an Adenovirus-SV40 "Hybrid" Population. L. A. Feldman, J. L. Melnick, and F. Rapp 778
Multiple-Tailed T4 Bacteriophage. Kendall O. Smith and Melvin Trousdale 796
Multiplication of Polyoma Virus. I. Use of Selectively Labeled (H^3) Virus to Follow the Course of Infection. G. P. Khare and R. A. Consigli 819
Erratum 836

No. 4, October 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Numerical Taxonomy of Some Bacteria Isolated from Antarctic and Tropical Seawaters. Robert M. Pfister and Paul R. Burkholder 863
Numerical Taxonomy of Certain Coryneform Bacteria. G. A. Nigel da Silva and John G. Holt 921
Biochemical and Cellular Changes Occurring During Conjugation in *Hansenula wingei*. Thomas D. Brock 1019
Microbiological Method for the Determination of L-Tryptophan. Oldrich K. Sebek .. 1026
Morphology, Antigenicity, and Nucleic Acid Content of the *Bacteroides* sp. Used in the Culture of *Entamoeba histolytica*. Richard A. Albach, James G. Shaffer, and Robert H. Watson 1045
Cell Division in a Species of *Erwinia*. IX. Electron Microscopy of Normally Dividing Cells. E. A. Grula and Gerald L. Smith 1054
Electron Microscopy of Chromatophores of *Rhodopseudomonas spheroides*. K. D. Gibson 1059
Relationship of the Major Constitutents of the *Neurospora crassa* Cell Wall to Wild-Type and Colonial Morphology. P. R. Mahadevan and E. L. Tatum 1073

Structure and Composition of the *Bacillus anthracis* Capsule. A. A. Avakyan, L. N. Katz, K. N. Levina, and I. B. Pavlova 1082
Electron Microscopy of Bundled Flagella of the Curly Mutant of *Salmonella abortivoequina*. Michiko Mitani and Tetsuo Iino 1096
Characteristics of Seven "Variants" of the *Bacteroides* sp. Used in the Propagation of *Entamoeba histolytica*. Richard A. Albach, James G. Shaffer, and Joseph J. McDade 1143
Differential Spore and Lipid Staining at Room Temperature by Use of a Fluorescent Dye. James W. Bartholomew, Max D. Lechtman, and Harold Finkelstein 1146
Deoxyribonucleic Acid Base Composition and Adansonian Analysis of Heterotrophic, Aerobic Pseudomonads. R. R. Colwell, R. V. Citarella, and I. Ryman 1148

Infection and Immunity

Chemical Composition and Biological Properties of the Endotoxin of *Brucella abortus*. Phillip J. Baker and J. B. Wilson 895
Hypoferremia in Mice and Its Application to the Bioassay of Endotoxin. Phillip J. Baker and J. B. Wilson 903
Effect of Dietary Factors upon the Resistance of Albino Mice to Experimental Infection with *Mycobacterium tuberculosis*. Herbert W. Layton and Guy P. Youmans 958
Some Metabolic Aspects of Tolerance to Bacterial Endotoxin. L. Joe Berry and Dorothy S. Smythe 970
Endotoxin-Induced Susceptibility to Staphylococcal Infection and Its Reversal by Adrenergic Blocking Agents. Barnet M. Sultzer and Henry H. Freedman 1001
Bacillary Necrosis, a Disease of Larval and Juvenile Bivalve Mollusks. I. Etiology and Epizootiology. Haskell S. Tubiash, Paul E. Chanley, and Einar Leifson 1036

Genetics and Molecular Biology

Loss of Activity of Transforming Deoxyribonucleic Acid After Uptake by *Haemophilus influenzae*. Mary Jane Voll and Sol H. Goodgal 873
Protein Turnover in the Cell Cycle of *Escherichia coli*. Arsuke Nishi and Tokio Kogoma 884
Development of Competence of *Haemophilus influenzae*. Hugh T. Spencer and Roger M. Herriott 911
Positive Control of Enzyme Synthesis by Gene C in the L-Arabinose System. Ellis Englesberg, Joseph Irr, Joseph Power, and Nancy Lee 946
Inhibition of Protein Synthesis by Polypeptide Antibiotics. I. Inhibition in Intact Bacteria. Herbert L. Ennis 1102
Inhibition of Protein Synthesis by Polypeptide Antibiotics. II. In Vitro Protein Synthesis. Herbert L. Ennis 1109
Biochemical Changes in Lysogenic *Bacillus stearothermophilus* After Bacteriophage Induction. N. E. Welker and L. L. Campbell 1129
Genetic Mapping of Fructose-1,6-Diphosphate in *Escherichia coli*. M. T. Yu, A. R. Kaney, and K. C. Atwood 1150
Technique for Starvation of *Escherichia coli* of Thymine. David Freifelder 1153
Auxotrophic Mutation and Infectivity of *Agrobacterium tumefaciens*. James A. Lippincott, Janice H. Webb, and Barbara B. Lippincott 1155

Microbial Physiology and Metabolism

Fructose-1,6-Diphosphatase and Acid Hexose Phosphatase of *Escherichia coli*. D. G. Fraenkel and B. L. Horecker 837
Biotin Transport and Accumulation by Cells of *Lactobacillus plantarum*. I. General Properties of the System. James R. Waller and Herman C. Lichstein 843
Biotin Transport and Accumulation by Cells of *Lactobacillus plantarum*. II. Kinetics of the System. James R. Waller and Herman C. Lichstein 853
Inhibitory Action of Selenite on *Escherichia coli*, *Proteus vulgaris*, and *Salmonella thompson*. K. F. Weiss, J. C. Ayres, and A. A. Kraft 857
Effect of Polymyxin B, Tyrocidine, Gramicidin D, and Other Antibiotics on the Enzymatic Hydrolysis of Poly-β-Hydroxybutyrate. J. M. Merrick 965

Cell-Free Amino Acid-Incorporating System from *Pseudomonas indigofera*. Tsuru Shiio and Bruce A. McFadden 978
Formation of Lactyl-Coenzyme A and Pyruvyl-Coenzyme A from Lactic Acid by *Escherichia coli*. Robert E. Megraw, Henry C. Reeves, and Samuel J. Ajl 984
Benzo[a]pyrene Uptake by Bacteria and Yeast. B. G. Moore and Arthur P. Harrison, Jr. 989
Adenosine Triphosphate Pool During the Growth Cycle in *Streptococcus faecalis*. W. W. Forrest 1013
Effect of 2-Deoxyglucose on *Schizosaccharomyces pombe*. Roland Megnet 1032
Immunochemical Studies on α-Amylase. III. Immunochemical Relationships Among Amylases from Various Microorganisms. Stitaya Sirisinha and Peter Z. Allen ... 1120
Growth of *Aerobacter aerogenes* on D-Arabinose and L-Xylose. K. P. Camyre and R. P. Mortlock 1157
Halophilic Enzymes in Cell-Free Extracts of *Halobacterium salinarium*. Peter K. Holmes, Ian E. D. Dundas, and H. Orin Halvorson 1159

Virology

Role of Superinfecting Phage in Lysis Inhibition with Phage T4 in *Escherichia coli*. Blanka Rutberg and Lars Rutberg 891
Effect of 5-Fluorouracil on the Growth of Bacteriophage R17. A. F. Graham and Clare Kirk 928
Synthesis of Reovirus Ribonucleic Acid in L Cells. Hajime Kudo and A. F. Graham ... 936
Effect of Ribonucleic Acid Phage Superinfection on Lysis-Inhibited *Escherichia coli*. Neal B. Groman and Grace Suzuki 1007
Effect of Particle Aggregation on the Survival of Irradiated Vaccinia Virus. G. J. Galasso and D. G. Sharp 1138
Erratum 1160

No. 5, November 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Numerical Survey of Some Bacterial Taxa. D. D. Focht and W. R. Lockhart 1314
Basal Structure and Attachment of Flagella in Cells of *Proteus vulgaris*. Dinah Abram, Henry Koffler, and A. E. Vatter 1337
Comparison of the Ultrastructure of Several Rickettsiae, Ornithosis Virus, and *Mycoplasma* in Tissue Culture. Douglas R. Anderson, Hope E. Hopps, Michael F. Barile, and Barbara C. Bernheim 1387
Multiple Septation in Variants of *Bacillus cereus*. C. C. Remsen and D. G. Lundgren .. 1426
Structure of Bacterial L Forms and Their Parent Bacteria. Claes Weibull 1467
Deoxyribonucleic Acid Base Composition of *Pseudomonas piscicida*. M. Mandel, O. B. Weeks, and R. R. Colwell 1492

Infection and Immunity

Experimental Salmonellosis. VII. In Vitro Transfer of Cellular Immunity by Ribosomal Fraction of Mouse Mononuclear Phagocytes. Ichiei Sato and Susumu Mitsuhashi 1194
Evidence for a Streptomycin Permease. Charles Hurwitz and Carmen L. Rosano 1233
Temperature Optimum of *Mycobacterium leprae* in Mice. Charles C. Shepard 1271
Immunological Paralysis Against Type VIII and Immunity Against Type III *Diplococcus pneumoniae* Induced by the Soluble Specific Substance of Type VIII. Marcus S. Brooke 1296
Growth of *Allescheria boydii* in Antibiotic-Containing Media. John Cazin, Jr., and David W. Decker 1308
Mitochondrial Fatty Acid Oxidation and Susceptibility to Endotoxin in Acute Liver Injury. W. Edmund Farrar, Jr., Laurence M. Corwin, and Thomas H. Kent 1365
Sedimentation Counting and Morphology of *Mycoplasma*. Harold W. Clark 1373

Biological Properties of Streptococcal Cell-Wall Particles. I. Determinants of the Chronic Nodular Lesion of Connective Tissue. John H. Schwab 1405
Biological Properties of Streptococcal Cell-Wall Particles. II. Purification by Density Gradient Column Electrophoresis. John H. Schwab 1412
Relationship of *Mycoplasma pneumoniae* to Other Human *Mycoplasma* Species Studied by Gel Diffusion. David Taylor-Robinson, Otakar Soběslavský, and Robert M. Chanock 1432
Identification of a New Enterotoxin as Enterotoxin C. Merlin S. Bergdoll, Concordia R. Borja, and Remedios M. Avena 1481
Ultrastructural Study of the Host-Bacterium Relationship in Erythrasma. Leopoldo F. Montes, Mollie E. McBride, Wilhelm P. Johnson, Donald W. Owens, and John M. Knox 1489

Genetics and Molecular Biology

Relative Frequencies of Different Kinds of Spontaneous and Induced Mutants of Pneumococci and Streptococci Capable of Growth in the Presence of Streptomycin. Arnold W. Ravin and Ajit K. Mishra 1161
Drug Resistance of Enteric Bacteria. V. High Frequency of Transduction of R Factors with Bacteriophage Epsilon. Mitsuo Kameda, Kenji Harada, Mitsue Suzuki, and Susumu Mitsuhashi 1174
Polarity of Chromosome Replication in *Neisseria meningitidis*. Kaare Jyssom 1182
Nucleic Acid Homologies of Selected Bacteria, L Forms, and *Mycoplasma* Species. M. Rogul, Z. A. McGee, R. G. Wittler, and Stanley Falkow 1200
Lifetime of Bacterial Messenger Ribonucleic Acid. V. Moses and M. Calvin 1205
Physiological Aspects of Modification and Restoration of Chromosomal Synthesis in Bacteria After X-Irradiation. Daniel Billen and Roger Hewitt 1218
Relationship Between the Competence-Antigen and the Competence-Activator Substance in Pneumococci. Alexander Tomasz and Samuel M. Beiser 1226
Kinetic and Genetic Analyses of D-Cycloserine Inhibition and Resistance in *Escherichia coli*. Roy Curtiss III, Leigh J. Charamella, Claire M. Berg, and Paula E. Harris 1238
Nucleotide Composition of Nucleic Acids of Fungi. I. Ribonucleic Acids. R. Storck 1260
Interaction Between Colicinogenic Factor V and the Integrated F Factor in an Hfr Strain of *Escherichia coli*. Phyllis L. Kahn and Donald R. Helinski 1276
Factors Regulating Competence in Transformation of Streptococci. Roman Pakula 1320
Hybridization Between *Escherichia coli* K-12 and 15T$^-$, and Thymineless Death of Their Derivatives. Masahide Ishibashi and Yukinori Hirota 1496
Inhibition of Transformation of Streptococci by Antibodies. Roman Pakula 1501

Microbial Physiology and Metabolism

Metabolism of Poly-β-Hydroxybutyrate and Acetoin in *Bacillus cereus*. Leo A. Kominek and H. Orin Halvorson 1251
Interference with Valine and Isoleucine Biosynthesis by Cyclic Hydroxamic Acids. Robert W. Hogg, Chitra A. Biswas, and Harry P. Broquist 1265
Folic Acid Involvement in Cyclopropane Fatty Acid Synthesis in Lactobacilli. Thomas O. Henderson, John J. McNeill, and S. B. Tove 1283
Glutamate Transport in Wild-Type and Mutant Strains of *Escherichia coli*. Yeheskel S. Halpern and Meir Lupo 1288
Metabolism of Glutamic Acid in a Mutant of *Escherichia coli*. Joyce Vender, Kunthala Jayaraman, and H. V. Rickenberg 1304
Growth Stasis by Accumulated L-α-Glycerophosphate in *Escherichia coli*. N. R. Cozzarelli, J. P. Koch, S. Hayashi, and E. C. C. Lin 1325
Damage to *Streptococcus lactis* Resulting from Growth at Low *p*H. R. J. Harvey 1330
Autolytic Mechanism for Spheroplast Formation in *Bacillus cereus* and *Escherichia coli*. Raam R. Mohan, Donald P. Kronish, Roland S. Pianotti, Ray L. Epstein, and Benjamin S. Schwartz 1355
Effects of Toluene on *Escherichia coli*. Robert W. Jackson and J. A. DeMoss 1420

Effect of Oleic Acid on Growth and Cell Structure of Mycobacteria. Werner B. Schaefer and C. Willard Lewis, Jr. 1438
Decomposition of Poly-β-Hydroxybutyrate by Pseudomonads. F. P. Delafield, M. Doudoroff, N. J. Palleroni, C. J. Lusty, and R. Contopoulos 1455
Quinone-Independent Reduction of Cytochrome b_1 by Reduced Nicotinamide Adenine Dinucleotide in a Purified Soluble System from *Escherichia coli*. P. D. Bragg 1498
Ribonucleates and the Gram Stain. W. M. Normore and W. S. Umbreit 1500
Methyl Dipicolinate Monoester from Spores of *Bacillus cereus* var. *globigii*. P. H. Hodson and J. W. Foster 1503
Effect of Glucose on the Capacity of *Escherichia coli* to be Infected by a Virulent λ Bacteriophage. William V. Howes 1188
Detection of Viruslike Particles in Germ-Free Mice. Masahiro Kajima and Morris Pollard 1448
Acridine Orange Staining of Purified Rat Virus Strain X14. Richard M. Jamison and Heather D. Mayor 1486
Detection of a Lymphocytic Choriomeningitis-Inducing Component in Rabies Virus Preparations. T. J. Wiktor, M. V. Fernandes, and H. Koprowski 1494

No. 6, December 1965

Taxonomy, Ecology, Morphology and Structure, and Microbiological Methods

Use of Secondary Data in Numerical Taxonomy of the Genus *Erwinia*. W. R. Lockhart and Karen Koenig 1638
Identity of the Filterable Hemolytic Anemia Agent of Sacks with *Haemobartonella muris*. D. H. Moore, R. N. Arison, H. Tanaka, W. T. Hall, and M. Chanowitz 1669
Use of Dialyzing Culture Technique for High Yield of *Mycoplasma*. Mary E. Pollock 1682
Washing Bacteria by Centrifugation Through a Water-Immiscible Layer of Silicones. Charles Hurwitz, Catherine B. Braun, and Richard A. Peabody 1692
Isolation and Characterization of Filterable Marine Bacteria. J. I. W. Anderson and W. P. Heffernan 1713
Fine Structure of *Haemobartonella muris* as Compared with *Eperythrozoon coccoides* and *Mycoplasma pulmonis*. H. Tanaka, W. T. Hall, J. B. Sheffield, and D. H. Moore 1735
Phase-Contrast and Electron Microscopy of Murine Strains of *Mycoplasma*. John B. Nelson and Michael J. Lyons 1750
Morphology of *Mycoplasma laidlawii* Type A. I. Comparison of Electron Microscopic Counts with Colony-Forming Units. D. L. Anderson, M. E. Pollock, and L. F. Brower 1764
Morphology of *Mycoplasma laidlawii* Type A. II. Effect of Glucose on Growth and Cellular Morphology. D. L. Anderson, M. E. Pollock, and L. F. Brower 1768
Differential Media for the Identification of *Bacillus anthracis*. Ralph F. Knisely 1778

Infection and Immunity

Mouse C-Reactive Protein and Eondotoxin-Induced Resistance. L. T. Patterson and R. D. Higginbotham 1520
Diabetes and Host Resistance. I. Effect of Alloxan Diabetes upon the Phagocytic and Bactericidal Efficiency of Rat Leukocytes for Pneumococcus. H. Frances Briscoe and Fred Allison, Jr. 1537
In Vitro Inhibition of Diphtheria Toxin Action by Ammonium Salts and Amines. K. Kim and N. B. Groman 1552
Mode of Inhibition of Diphtheria Toxin by Ammonium Chloride. K. Kim and N. B. Groman 1557
Incorporation of C^{14} from Amino Acids and Peptides into Protein by *Clostridium perfringens* Type R. Andreas H. W. Hauschild 1569
Inactivation of Cephalothin and Cephaloridine by *Staphylococcus aureus*. Ernest J. Benner, John V. Bennett, Jean L. Brodie, and William M. M. Kirby 1599
Nonspecific Factors in Resistance of Mice to Experimental Tuberculosis. Guy P. Youmans and Anne S. Youmans 1675

Polysaccharide-Lipid Complexes from *Veillonella parvula*. Stephan E. Mergenhagen.. 1730
Peptides for Toxinogenesis of *Clostridium perfringens* Type D. Andreas H. W. Hauschild 1793

Genetics and Molecular Biology

Variation in Density and Transformation Potential in Deoxyribonucleic Acid from *Neisseria meningitidis*. Kaare Jyssum and Sidsel Jyssum 1513
Stability of β-Galactosidase Messenger Ribonucleic Acid in *Escherichia coli*. Fakher Ben-Hamida and David Schlessinger 1611
Kinetics of Bacteriophage λ Deoxyribonucleic Acid Infection of *Escherichia coli*. Benjamin J. Barnhart 1617
Role of Aminoacyl-Transfer Ribonucleic Acid in the Regulation of Ribonucleic Acid Synthesis in *Escherichia coli*. D. W. Morris and J. A. DeMoss 1624
Reciprocal Recombination of Chromosome and F-Merogenote in *Escherichia coli*. Robert K. Herman 1664
Slow Motile Mutant in *Salmonella typhimurium*. Masatoshi Enomoto 1696
Deoxyribonucleic Acid Base Composition of Myxobacteria. Manley Mandel and E. R. Leadbetter 1795

Microbial Physiology and Metabolism

Ureidoglycolate Synthetase of *Streptococcus allantoicus*. I. Measurement of Glyoxylate and Enzyme Purification. Elizabeth T. Gaudy, R. Bojanowski, R. C. Valentine, and R. S. Wolfe 1525
Ureidoglycolate Synthetase of *Streptococcus allantoicus*. II. Properties of the Enzyme and Reaction Equilibrium. Elizabeth T. Gaudy and R. S. Wolfe 1531
Modification of Radiation Damage of Bacteria by Folic Acid Antagonists. Robert F. Pittillo, Mary Lucas, Robert T. Blackwell, and Carolyn Woolley 1548
Protein Turnover in *Escherichia coli* as measured with an Equilibration Apparatus. Elliot M. Levine 1578
Trehalose as an Endogenous Reserve in Spores of the Fungus *Myrothecium verrucaria*. G. R. Mandels, Rasma Vitols, and Frederick W. Parrish 1589
Sorbose Counterflow as a Measure of Intracellular Glucose in Baker's Yeast. Peter O. Wilkins and Vincent P. Cirillo 1605
Specificity of the Heme Requirement for Growth of *Bacteroides ruminicola*. D. R. Caldwell, D. C. White, M. P. Bryant, and R. N. Doetsch 1645
Pigment Production from Tryptophan by an *Achromobacter* Species. John A. Duerre and Patrick J. Buckley 1686
Nitrogen Dioxide Fixation in Bacterial Chromatin Studies. Charles Eller and William H. Beckert 1710

Virology

Use of Tetrazolium Salts for Electron Transport Studies in Meningopneumonitis. I. Reduced Nicotinamide Adenine Dinucleotide System. Emma G. Allen 1505
Nucleic Acid-Induced Resistance to Viral Infection. Kouichi Takona, Joel Warren, Keith E. Jensen, and Alan L. Neal 1542
Factors in Lysis and Lysis Inhibition by Lambda Bacteriophage. Neal B. Groman... 1563
Correlation between Susceptibility to Bacteriophage PBS1 and Motility in *Bacillus subtilis*. Terence M. Joys 1575
Thermostabilization and Thermosensitization of Herpesvirus. Craig Wallis and Joseph L. Melnick 1632
Characterization of *Bacillus subtilis* Bacteriophages. Anna M. Brodetsky and W. R. Romig 1655
Autoradiographic Study on Sheeppox Virus Infection. António M. Terrinha, José D. Vigário, José L. Nunes Petisca, J. Moura Nunes, and Armando L. Bastos 1703
Previously Unrecognized Virus from Submaxillary Glands of Gnotobiotic and Conventional Rats. Warren K. Ashe, Henry W. Scherp, and Robert J. Fitzgerald... 1719

Inner Component of Respiratory Syncytial Virus. Edward A. Eckert, H. F. Maassab, and Joseph J. Cavallaro 1784
Microscopy of the Release of a Simian Adenovirus. Caroline K. Y. Fong, K. G. Bensch, L. R. Miller, and G. D. Hsiung 1786
Electron Microscopy of a Canine Herpesvirus. J. D. Strandberg and L. E. Carmichael . 1790
